Injury report colts vs patriots

29 November 2020: orchard park, new york, oa; buffalo wide receiver stefon diggs (14) heats up before the game against the Los Angeles chargingrs at the bills stadium. obligatory credit: rich Barnes-USA today sport buffalo bills are preparing for their first home playoff game since 1996 and will be in front of Indianapolis colts on Saturday. on Wednesday, the team had two receivers wide start miss practice. the first player is cole beasley, who suffered a knee injury against new england patriots, and lost last week's game against mymi dolphins. head coach sean mcdermott described the injury as week a week after it occurred and the fact that he was unable to practice again this week, is not a good sign for his availability this weekend. the other great name on the accident report is stefon diggs, which did not practice after being limited yesterday, which was a passage through. While this may cause some concern, the good news is that stefon diggs faced it on Wednesday and said it was fine and it would be nice to go. stefon diggs, when asked for his oblique injury on Wednesday offered the following. "I'm fine. no important problem," he said. "I want to say he's only been around for a while, but I'm fine. I'll be fine." diggs was a non-participant in wed practice. #billsmafia #Bills— chris brown @chrisbrownbills) January 6, 2021stefon diggs finished its first season with buffalo bills as a league leader in receptions (127) and in receiving yards (1,535). the facthe was able to say that this is not an important problem will be a great boost for this crime. In addition to Diggs and Beasley, the Bills also had a wide receiver Isaiah McKenzie limited to an ankle injury. McKenzie replaced Beasley in the start training this week against the Dolphins and had a career game with two receiving touchdowns and a punt return for a touchdown. Next: 4 bigger stories from the regular season for the Bills A player who seems to be on the track to return for this game is Reggie Gilliam. The undesigned rookie has lost the last two weeks due to injury, but if it is able to return it should fall into its role as a key part of the special team unit. Status of the game: Stefon Diggs is ACTIVE for the playoff opening against the Colts. Game Day Update: Stefon Diggs is expected to play on Saturday, for Jeremy Fowler of ESPN. An alarming development in Buffalo this week as wide receiver Bills Stefon Diggs made a surprise appearance on this week's accident report. It is officially listed as questionable for the Saturday Wild Card game against the Indianapolis Colts with an oblique injury. All eyes will be looking for news about the state of Diggs as he is one of the most popular choices for fantasy football lineups this week. That's how to handle the situation. Fantasy impact: Stefon Diggs (oblique) Diggs appeared on the accident report on Tuesday, when it was limited in practice. Then the Wednesday session sat down before returning toin a limited capacity on Thursday. This is probably the best sign we will get, outside the real confirmation, which will be active on Saturday. If for some reason he can't play, this would be the value of John Brown, who can be had for a song in DraftKings Championships this week. What really complicates the matter is that Cole Beasley is also questionable with a knee injury that forced him to lose last week's game. If you can't play, Isaiah McKenzie would take care of slot tasks and even a real fantasy charm. Beasley and Diggs did not practice Tuesday and Wednesday, but they were both limited in Thursday practice. When Cole Beasley wounded his knee in Week 16 victory against the New England Patriots, Buffalo Bills fans were nervous, but they hoped he could come back in time for the playoffs. It didn't seem promising for a while, but Beasley could beat the odds after all. Beasley returned to practice (limitedly) on Thursday, the final practice of the week, and was listed as questionable in front of the game Wild Card on Saturday with the Colts Indianapolis. Another aspect of this week's accident report was Stefon Diggs (oblique). The star receiver was limited on Tuesday and Thursday, and did not practice at all on Wednesday, and the team ruled it questionable accordingly. While head coach Sean McDermott spoke conservatively about Diggs this week, the player himself said he was "good" on Wednesday, so expect him to play. And this is in terms ofBills' wounds! Isaiah McKenzie (ankle) was a complete participant on Thursday and is good to go this weekend. Jon Feliciano (knee) and Reggie Gilliam (knee/hamstring) were full participants throughout the week. Surprisingly, the Bills are heading towards the playoffs with their only remarkable injury that is left guard Cody Ford, already in reserve of late season injured. The Colts excluded the Rock Ya-Sin cornerback and faced Will Holden. The DeForest Buckner (ankle) star defensive lineman is questionable, after losing two days of practice before the week, but should play this weekend. Rookie running back Jonathan Taylor (shoulder,) who has been limited all week in practice, will play. Play.
