The new Minecraft 1.16.101 update contains interesting updates. Firstly, it should be noted that the emergence of a new most complex material of the game is Netherite.

Depending on its properties, he even bypasses the favorite diamond of many players. Bastions in version 1.16.101 Minecraft, a rather large structure is created in the hellish dimension. Nevertheless, the remains of the bastion are not very noticeable, despite its huge size. In fact, this structure most often seems underground.

The use of Bastionremnant Control /Rent will allow you to quickly find the destroyed bastion. The main inhabitants of the remnants of the bastion are pigs, gongglines and cruel suction cups. The latter are especially dangerous for the user, because they can end several lives in one blow. In addition to the remnants of the bastion, a destroyed portal appeared in the game. On Twisted Forest, a new place in Minecraft 1.16.101, which is located in the Netherlands. A distorted forest is a very peaceful and mysterious place. Here the player can find distorted mushrooms. And they, as you know, are used to tame the attackers and scare Hugins.

A perverted forest is also the safest place in the Netherlands. In the end, there are only Enderwaders. And this crowd will not attack until the user looks at their eyes. Straider also needs to mention the appearance of a new monster in version 1.16.101 Minecraft - Strider. This is unique in the sense that it can be tamed. The player can then install the saddle in this crowbar. And, as you know, a pedestrian can walk in lava. This means that the user can safely walk in lava using this creature. And at the same time, you no longer need to spend a lot of blocks to build various bridges on lava lakes. MCPE 1.16.201 highlights the main features of Minecraft PE 1.16.201 Highland Goats are. These crowds have become very important to the local ecosystem. Now they are even better. Improvements in the studios Mojang clarified that the latest update is nearing the end of the development cycle. Caves and rocks have arrived. One of the features of the rock is the goat MCPE 1.16.201. If you have enabled your experimental game, you can face these evil mobs. You can find the contents of the cave and the rock in the settings. In fact, goats no longer jump on a block of magma and damage. Previously, goats could multiply in groups of two to ten, and some were still children. However, only one goat can be released at once on Minecraft PE 1.16.201. Goats adapt as a reminder, dropping into corners if they heat or kill a block. The fall chance has been reduced slightly, making it slightly less common now. For example, Minecraft PE 1.16.201 Of course, you can't get more than a pair of goat horns without a robbery spell. By the way, Baks will also not be able to jump on honey blocks. Despite their strong legs and endless jumping, they are still weaker than sticky honey. On the other hand, some deer deviated a bit from their target and hit standing persons. The stationary player will be affected in the future.

Minecraft PE 1.16.201 Goats have no immunity after jumping. Some players have really stated that they can't beat cattle after their furious nerve moves, which they do. Other bulls were even more emotional than expected, you couldThey do very high jumps. This is fixed, so this little miracle is no longer MCPE 1.16.201. In today's article we will tell you about the new content that awaits us all in the next update of the Netherlands, believe that these information is worth it!We are all expecting a new world update, update , Update that all the Netherlands should change is more interesting and interesting for the game. st Minecon-2013. This Sione worm has already been released for Android users. Let's have a fun part, let's go to hell! We'll start a review with the crowd, like Civildaleal! This is a hostile mob that spawns in certain biomes, but more common in the Red Forest. Attack creatures like Hoglin. These mobs only hunt in groups. They love gold so much. Do not attack the player in gold armor. But if the player opens his chest, the gold armor will not save him.

For example, gold, like standing golden bars and this controls them. This mob can exchange various useful items with gold. In the presence of the fire of the soul, he departs. Being in the world turns into zombie -sveign. He can play with Baby Hoglin. These crowds make their strongholds.Be careful when opening the door. The likelihood of a new piggy is 25%. He has 16 health. Another crowd we have mentioned several times before is Hoglin. It is also a hostile crowd like a pig and like a spawning pig forest. These crowds also move in groups of 4 people. This creature can throw a player during the attack. Increased attack range. Propagated using dark red mushrooms. He does not like and is afraid of deformed mushrooms. Raw pork and leather drops. You may face a 25% chance that your baby may fall asleep. When they press them, they dispel in different directions. Where did the strange Hoglin name come from? For those who do not know this name, the players chose the vote made by Mojang Studio before the release. Of all the options, the players chose Hoglin's title. It was this word that won the vote among other words. The following names were also offered: 1. Hanged ham; 2.Jef; 3. Budon Buddy; 4. Tusky McTusface; 5. Pig that can walk; 6. Non -cultivated pigs; 7. Pre -pombatum pig; 8. sweet meat; 9. Too sweet to be hostile, forgive. How to get it?

To do this, find the ancient waste at the bottom. Use nosherit or diamond shell to break. Evidence of non -end debris scrap. 4 None of the scraps + 4 Gold Ruses = None of the Engots. The new material is very rare and the most expensive in the Minecraft world. This material improves armor of diamonds and other tools and increases their durability. The first material for choosing a diamond direction after 10 years! The bastion is a kind of building, the anchorage that crowds like pigs. The distorted forest 1. Soul sand group is the most dangerous lowest bioms. All biomes are covered with turquoise fog. A big field thatSoul sand and soul soil. Fossil remains and pillars are the most common structures in the biome. The open terrain, frequent occurrences of Ghosts, Endermen and skeletons make the biome very dangerous for survival. It is better to carry firearms and heavy armor. In the biome you can get Bonemeal, Glowstone Dust, Basalt and explore the Dutch Fortress. A lot of blue flame is visible; 2. Crimson Forest is one of the new biomes in the Nether update. The biome consists of red blocks. The mahogany forest is full of vegetation: giant mushrooms, weeping vines, small mushrooms, light mushrooms. The surface of the biome consists of Crimson Lely and Netherack. Deformed roots can grow on stones. The Crimson Forest is home to creatures such as Piglins and Hoglins. A red mist surrounds the entire biome. And much more that you can discover on your own in this biome; 3. Warped Forest is a biome included in the Minecraft Nether update. It consists of bright turquoise blocks. This place is suitable for mining turquoise wood. In addition, the biome produces curved Nether roots and sprouts. The biome is characterized by a dark turquoise haze. Warped Forest is a safe place, only Enderman appear here. Lots of different vegetation and more. Soul Soil is a block similar to Soulsand. It doesn't bother the players. Soul Soil fire turns blue. Soulfire works like normal fire. Deals double damage. Appears when you light up Soul Soil. He created Soul Sand Valley. Eternal and never-fading. A new block called Target. It's a mechanical block that reacts to being hit by an arrow or trident. This creates a redstone signal. As you get closer to the center, the signal level increases. Maximum signal level can be 15 units Other changes: 1. New types of trees in the Netherlands; 2. Install the spawn in "The Nether"; 3. Zombie Pigman renamed to Zombie Piglin;4. When struck by lightning, the pig will no longer transform into aAgreed Pigman.ay article will be updated in the near future with new information. Information.
