Update my facebook apk

Facebook APK is a multi-platform social networking application, which allows you to connect with friends and share interests, happy and sad, swings up and down during the day, from anywhere, at any time, until there is internet.

NameFacebookPackagecom.facebook.katanaPublisherFacebookCategorySocialVersion317.0.0.51.119 (build 283419119)Dimension42MRrequiresAndroidMOD FeaturesNoFacebook: I'm talking about an app that everyone knows Welcome to the world's largest social networkYes, you haven't read bad. Today I am writing a few short paragraphs to introduce an app that everyone knows what it is. To talk about it, I feel a little embarrassed. But let me write it. Facebook is the app of, of course, the social network Facebook. Almost everyone on this planet, in regions with Internet access, has a Facebook account (many years ago, my parents also added my Facebook friend). After many years of development, Mark and his associates had a huge success exploding from a very ordinary startup idea. Now, that "book" has an indispensable part in every person's life. Facebook also contributed to deletion of Yahoo, Yahoo chat, and many other platforms that were once in the past. Ignoring all the fuss about the security, privacy of Facebook, or increasingly commercial, now we only talk about Facebook app and the features we can do with this application. In particular, what can we do with the Facebook app? Connect seamlessly with friends, family and colleagues.Of course, both make friends with lovers or new knowledge to maintain a long-term relationship in the future. There are unexpected and poetic friendships from Facebook and touching stories of people who unknowingly find themselves in the years via Facebook. Post, share and tell people about your moods, thoughts and current feelings with a new update status line at any time. Accompanies hundreds (even thousands with extended sequences) of different emojis to add more emotion to your state. And through the state of other people, you can learn more about them, find empathy or just look at certain hot news. In addition to posting the state in words, I can also publish beautiful photos, videos, memes and my favorite milestones for everyone to see. See information from friends about events / groups dating in the surrounding area near you. The option inside or not depends on you, but at least, you should know about these to keep up with the hot events around. Play games, invite friends in the list of friends to play with, it is also fresh enough and kill time in a healthy way. If you are a fan of some artists, you can easily find information and track their "situation" easily through Facebook. But in general, on Facebook, you can follow everyone, until they block them. You can also use Facebook to view product information, favorite companies, contact information, and buy anything. If you are planning to sell online or promote your products, then Facebook is a precious treasure. Ofyou will need the paid function called Facebook Ads (and many others.) But to get a wide range of interest, a tool to promote neatly, on the target, and at the right time, Facebook is a great channel. Share your story, day by day, using the Facebook Story feature. Unlike the state that has to concentrate much thinking when just leaving a good caption absorb, Story mainly uses images (stills/ animations) and videos. Words are only secondary to share history. History has passed quickly, do not hold on newsfeeds, but now it is a feature that many young people love to use (including me) because of its clean, fast-food, and a little easy style. Facebook is now known for a network of dense relationships and extremely logical systems. Typical is this: every day Facebook will look somewhere in the database for related relationships, suggest a number of nick/person names that you can be associated or want to connect to Facebook. These new people are more or less directly related to you or people who frequent contacts on Facebook. Thanks to this huge database, Facebook is now taking the league position in social networks. Download Facebook APK for Android There are many interesting and extremely useful things from Facebook. Anyone who does not have a Facebook account, quickly click on this link to download this app today. Continuing with friends is faster and easier than ever. Share updates and photos, interact with friends and pages and stay connectedimportant to you. facebook features include:* connect with friends and family and meet new people on your social network * set status updates and use emoji facebook to help relay what is happening in your world * share photos, videos and your favorite memories. * Receive notifications when friends love and comment on your posts * find local social events, and make plans to meet friends * play games with any of your facebook friends * backup photos saving them in albums * follow your favorite artists, websites and companies to get their latest news * watch local companies to see reviews, hours of operation and images * buy and sell locally on facebook marketplace * watch live videos on the gothe facebook app more. is also your personal organizer to store, save and share photos. It is easy to share photos directly from the android camera, and you have full control over photos and privacy settings. You can choose when to keep individual private photos or even set a secret photo album to check who sees it. facebook also helps you keep up with the latest news and current events around the world. Sign up to your favorite characters, brands, news sources, artists or sports teams to follow their newsfeeds, watch live streaming videos and be caught on the latest events, no matter where you are!app, such as writing on timeline, pleasure photos, browsing for people, and editing your profile and groups. groups.
