# How to transfer pictures laptop to android phone

How to transfer pictures from laptop to android. How to transfer pictures from my android phone to my laptop. How to transfer pictures from android phone to laptop computer. How to transfer photos laptop to android. How to transfer pictures from android phone to hp laptop. How to transfer pictures from android phone to apple laptop. How to transfer pictures from android phone to mac laptop. How to transfer pictures from android phone to dell laptop.

Because mobile phones are generally more simplistic than most stand-alone digital cameras, observing good technique is central to make large photographs. The first thing you should do is make sure your camera lens is clean and free of dust - a clean with any cloth of glasses will make your trick. Then set your camera to take pictures at maximum resolution and image size possible. These steps will improve your shots dramatically regardless of what you're photographing. When choosing the subject, it is important to become familiar with the limitations of your camera phone. These devices are usually not good with movement or low light. The scenes with one of these conditions can be blurred and poorly lit images often contains "noise" or digital grainy imperfections. If the phone has an integrated flash LED, use it to illuminate neighboring subjects, but you will do little if you're shooting something far away. While frames your image, avoid using digital zoom because this function simply cultivates the image, resulting in more pixelated photograph. Instead, approach or further out of the subject, if possible, if possible, you have your composed photo, there are still a couple of things to remember before pressing the shutter button. As the camera phones often have a slow shutter speed, try to keep your device as constant as possible when the image is taken. To get the best results, keep the phone with both hands, take a deep breath and exhale slowly while shooting the photo. When you hit the button, you will probably notice a slight delay. Compensate this delay by continuing to hold the camera for a second or two after pressing the shutter button. After making some photographs, there are still things you can do to improve them or make them more interesting. Adobe Photoshop, used for editing photos on a desktop computer or laptop, offers numerous tools with which you can clean up and sharpen your images, or even make them look better when enlarged. If you want to edit images directly on your phone, programs such as iPhone photo offer tools such as automatic noise reduction, white balance exposure adjustments and capacity to create filter effects. Arrests with these suggestions and techniques, you will be surprised what you can do with a simple photographic phone. There are dozens "Probably hundreds" of Android phones on the market today. Some of them are exclusive for specific vectors, some of them are available throughout the world, but only some of them are at the top of their class. This week we wanted to know What Android phones thought were the best available, not just because a high-end functional or high-end hardware lists complete, but why do you think you offer a great overall experience. Here is a look at the top five Android phones, based on yours Nomination. At the beginning of the week, we asked you what Android phones that you think was the best. There are many sites willing to tell you what the phones are the best based on the chips inside, the camera, storage or version of Android pre-installed, but those things are not always added to an excellent user experience. We asked you what "past or present - thought phones were the best, and OL Three 300 nominations later, we returned to highlight the first five. The survey is closed and the votes are counted! To find out which of the five contenders below followed the first prize based on your vows, go to our Alveario Five Follow-Up Post to find out and discuss the winner! At the of a decent Android phone? Of course, we know that the market will be completely different within a reading of Moresamsung Galaxy NoteSoften indicated as "Phablet" because of its inclusive and massive stylus super amoled display 5.3 ", the Samsung Galaxy note (AT & T, \$ 299 W / Contract) is enormous, but many of you praised to mix the portability of a phone with some real estate of tablets desperately needed. The rear and front cameras 8MP and 2MP EE Dual Core Processor not even damage the issues, and while it's definitely not the right size for everyone, those of you who have a love, and others do not see forward to his release on other carriers. Also, even if the galaxy note is pre-installed by Gingerbread of Android 2.3, there are many roms available to take it to Android 4.0 Sandwich Ice cream, or simply replace the touchwiz interface of Samsung entirely.HTC One X / STHE HTC Series is The most recent HTC attempt to recreate himself, not that the company really needs "most people who have used HTC devices love them and the HTC One X and are not exceptions to the rule. The only X (AT & T, \$ 199 W / Contract) is the new HTC flagship phone, 4.7 "sports screen, a NVIDIA Tegra 3 quad-core (internationally) or a Qualcomm Snapdragon dual-core processor (US / Canada), Android 4.0 ICE Cream sandwich (with UI Sense HTC on top), built-in audio beats and a 8 MP rear camera with a 1.3 MP front camera. The HTC One S (T-Mobile, \$ 189 W / Contract) on the other hand is a 4.3 "slightly smaller screen, a 1.5 GHz double-core processor, 8MP rear cameras and VGA, Beats Audio and Sandwich Ice cream. Both devices are thin, the Powerhouse devices designed to report the Focus Android Lovers Back to a group Select high-end HTC devices, instead of dozen-plus HTC released in the past. So far, It is functioning.Samsung Galaxy S / S devices samsung galaxy s series are some of the world's most popular smartphones, and even if samsung and apple are involved in a patented cause exactly as it is similar to the galaxy the iphone (and vice versa ), which has not stopped the galaxy s and the Galaxy S II to sell millions of units around the world. The Galaxy S was one of the first Android dual-core smartphones, and certainly one of the first to present the new one (at the time ) Super loving display of Samsung, offering lum colors Inosi and crunchy also in intense light. It is still available for a song depending on the courier you take it from (in the United States, it was sold under the vibrating name (T-Mobile), Captivate (AT & T), fascinated (Verizon Wireless) and Epic (Sprint ) In both 3G and 4G variants.) Party apart, the Samsung Galaxy S II is the current model of the company and has a super amoled 4.3 "display, a 1.2 GHz double-core processor, and While it was shipped with Android 2.3, most vectors slowly rolling upgrades to bring the device to Android 4.0. The price varies depending on the courier and the variant that you take, but one thing is certain: When it was launched, most people considered the Galaxy S II the best Android smartphone € ¤, ~ "if not the best smartphone € ¤, ~" available on the market, which makes the fury on the next Samsung Galaxy S III that the much stronger.Droid series of Motorola Motolorathe Droid (Motorola Milestone, live International llo) was one of the first Android phones on the market actually carrying Android to the Messe - and surely the first Android phone available on Verizon wireless at the moment. It was a hard call to group the Droid series together, but it is worth noting that those of you who named the Droid line in large numbers specifically mentioned the cursor models, not the CandyBar models such as the Droid RAZR, Razer Maxx, Or the bionic (although all all have strong nominations), all available on Wireless Verizon in the United States. Motorola Droid 4 (VZW, \$ 199 w / contract) is the current iteration of the phone with a qHD 4 "display, a 1.2 GHz dual-core processor, an 8 MP rear and front cameras 1.3 mp and in particular, a slide -out backlit keyboard that allows the phone to be used The portrait and scenic modes without sacrificing the real estate screen. The Droid line is still one of the few high-end Android devices to present a physical keyboard, making it popular both for portability and people who prefer physical keyboards to those on the screen. The Droid 4 Sport Android Gingerbread, and rides Verizon Wireless '4G' 4G Galaxy Nexusthe Samsung Galaxy Nexus (VZW, Sprint, \$ 199 / W Contract, \$ 399 unlocked) is the current official "Google Phone", launched with Android 4.0 Ice Cream Sandwich and currently serves as a leading Android device. Sport has a super-amorous 4.6 "display, a curved outline screen, a 1.2 GHz double-core processor and a 5 MP and 1.3 MP rear camera and front cameras. It's a pure experience of Google, which means that the phone is (largely) free of bloatware and other apps pre-installed by vectors and manufacturers, and in particular the UI Touchwiz UI level of Samsung in favor of a clean version of the ice cream sandwich. Il telephone also has sports the Google NFC payment system, Google Wallet. The camera boasts the delay of the zero shutter, and it was the first phone to launch with the pre-installed ice cream sandwich, and it's still one of the few devices that you can get already. If you want the most true and Android experience to be possible, or you want an Android phone that is officially supported by Google, this is. This is true, the first five Android phones, based on your nomination. Now it's time to vote for the Cha MP Champ.it was difficult this week to run the first five considering that there are three Samsung devices in the NG Runni, but some of them have obtained more nominations than some of the other combined contenders, so we cannot ignore the fact that many You have strong opinion on these specific models. Will you have something to say about the candidates we lost? Does your favorite phone does not have enough nominations to include? Remember, the first five are based on your most popular nominations from the call for the contenders thread from previous week. Share your thoughts in the comments below. The five hive is based on the reader's nominations. As with most Hive Five posts, if your favorite has been left out, it's not because we hate him "it's because he has not received the requested nominations in the call for the post of the contender to make the first Five. We understand that it's a bit of popularity competition, but if you have a favorite, do we want to hear it. Have a suggestion for hive five? Send us an email to tips+hivefive@lifehacker.com!
