## Attraction marketing formula book review

Before moving through this review Attraction Marketing Formula...... I was wondering if the following guestions sound familiar to you: Where can I learn how to generate leads for my network marketing business? What are the best ways to generate online port for multi-level marketing? What is the best website to buy MLM lead? The number 1 I hear from MLMers is this: "I need slopes..."... I created the hot market list my line told me to put together..."... It didn't produce much of anything except frustration like the people I know or said they aren't interested." Does it look familiar? The #1 reason for failure in network marketing is running from lead. Running money to pay for the simple lead generation is problem #2. Attraction Marketing is a marketing method that allows you to identify and attract people who are already trying to buy exactly what you are selling. Attraction marketing is the polar opposite of cover, supplication, pursuit or convince people to listen to you. Attraction Marketing allows, the network marketer, to save time while automating the prospecting process. It solves problems like these: "How can I help my new downline members get the results they are looking for?" "What can I do to ensure that my downline members will not fire?" Important note: I actually own the Attraction Marketing Formula product. This is not a Fake Review. I bought this product(as I will try below through screens and extracts) & used to build a 9-level deep international business mlm. if you need information about "reals" vs "fake" reviews, sitesell did a great piece on it here. here's what you'll learn within my review of attractive marketing formula: a simple definition of attraction marketing, as well as how the attraction marketing formula will help you: understand and implement the right way to use internet for unlimited daily lead streambrand yourself and create a unique business around your business mlm earn income even when some people don't join your main opportunity mlm use an automated way to build relationships and trust (frees up your precious time so that the only people you talk to are just ready to buy or join) a couple of negatives for the attraction marketing formula (and how to overcome them) 1) Every day, people who are already interested in what you offer are reaching you with requests on your products, services and business. 2) Every day, the hungry prospects are flooding in your facebook mailbox (or other social ones) with the desire to start a conversation with you about your business opportunity. 3) do not pursue any more, pray or convince uninterested people about the size of your products or business, remember this: the best product or business in the world does not help anyone when you do not know how to attract qualified and interested people every day in your "world". attractionis a marketing technique in which the result is that the prospects reach. The stress of starting contact with perspectives is eliminated when you learn to use Attraction Marketing. It is a process in which you provide value in advance. This Attraction Marketing process promotes trust and eliminates the need to convince people who are not interested in becoming interested in what they offer. Related content: 3 powerful secret tips for network marketing success Let's take a step back: Many network marketers do not know that they are actually in the marketing industry. Successful people come to the table with an attitude of "I need to keep an open mind and learn everything possible about marketing." They say to themselves: "I need to learn the basics of copywriting... how to articulate others both in writing and verbally." Learning to put Attraction Marketing to use within your MLM business is a basic block for the success you are looking for. QUICK ASIDEWhat Attraction Marketing It is not: I've seen blog writings where the author tries to convince us that there is something wrong with Attraction Marketing. We discuss this quickly only in case you run through these people. Bait & Switch tactics: Some people lump Attraction Marketing in with bait & switch fake revision tactics. They have a valid point on bait & switch, but are wrong in thinking that me or others like Ferny Ceballos within the Attraction Marketing Formula are teaching this. I saidReviews above. Mostly, these are bait & switch. The blogger will write a review on the A company product, making you believe they used it and are giving you a real account of how the product works. Instead, they put together some fluffs that have found on other sites about the A company product and then try to switch to buy something else (Company B product) so they are a branch. They go out with a promise to review a product you're looking for, but then switch to the other product. This is not just ethical, but it could be illegal (see the SiteSell Fake Review registration page I linked you at the beginning of this page). The real marketing of attraction has nothing to do with this. At the heart of the correct strategy is a process of providing useful content to the public. This allows your audience to see that you are not only useful, but reliable. As we will see later within my Marketing Formula review, this process is not only ethical and effective, it is exactly like all SUCCESSFUL online businesses operate. What is Attraction Marketing Formula? Attraction Marketing Formula is a marketing course created by Ferny Ceballos. Delivered as an ebook of 185 pages, he teaches network marketers how to attract perspectives through online marketing techniques. The aim is to help networkers who have exhausted hot contact leads to create a Attraction Marketing system that automates lead generation. The result of useMarketing formula? A business that is much more fun because you invest time talking only to people already interested in your products and/or business. What is so great about the attractive marketing Formula product? Are there any other resources that teach Attraction Marketing? Sure. So, what makes this particular product stand out over others? I'll work through those details while we move on... but I would like to emphasize two main factors: 1) Cost: I have seen other people in charge for coaching or other "special" training with the promise you will learn Attraction Marketing. They charge upwards of \$5000 for this information. With the Attraction Marketing Formula, you get training for a cost of time that a SUV owner downloads in their weekly gas tank. 2) Bonus: There are some bonuses I'll show you later. One of them is a personal coaching program that comes with the course (it is free, not \$5000). Learn how to use attraction marketing for online lead stream The best thing about this is that your lead generation efforts become automated. Don't misunderstand what I mean. Network marketing has been and will always be a business of people. People only buy and join people they know, how and trust. With this saying, the biggest sucker time in MLM is prospection. Using the rule of 3 feet, calling a hot market list, the prospect of people in Walmart, etc... this is all a "sucking time" because 99% of all those people have interest ZERO in what you are talking aboutWhat if I could cut all that time sucking the business out of your life? It's possible... if you use the power of online marketing correctly. Your online entities make the selection for you and only attract those people who have a real interest in solving the problems that your products and business solve. When you actually talk to someone, you are talking to someone who does not need to be convinced. Your online presence has already made 99% of education. That last 1% can only take a simple call... ... a relaxed, easy, non-painful call, because the person really wants to talk to you about how to proceed. Great difference from hearing your uncle Bob say: "What the fuck. They'll make you rich, huh? Anything..." (as you sit on the couch drinking Formula It teaches you how to "do" the right Internet In fact, it is in chapter two: How do you enjoy this? Benefits #1: Save your time #2: Removes frustration, guilt and stress... ... exploration that time is taken away from your family, that a lack of results means lower quality of life for your family... ... believing that you are investing too much time away from your family looking for time to suck prospection methods. . ...stress that comes from missing important family time and not provide better quality of life... It's like you're damned if you don't, right? The SOLUTION you get from information within Ch 2 attraction marketingMore quality of time with the family as automated cables roll in. qualified tracks (the best type.) .common guestions answered through automation. .a relaxed feeling, "winning" because you see the business growing as you spend time only with people "right" for your business and products. .less time spent on business, but the results are ten times. .money risk so you get to enjoy that quality of life that money provides for your spouse and children secondary benefits: a more relaxed family. best relationships with your children. ... without stress means a healthier "you" and family. This means less medical visits. less time lost at work and school More time with children to teach them life lessons. .you feel in control, powerful, inspired, successful, proud, etc. ... you gain extra time to invest in others' lives as well. I want to make sure I do a proper job to explain how critical this step is. here is an extract directly from chapter 2 of my personal copy of attraction marketing formula: potential concern you can have: and if you don't have time to teach a group of people what I know? I have a full-time job, I have to show the plan, follow and more! the answer comes in 2 parts: 1) continuing on the path that you are up now, you are spending more time prospection and building your inefficient downline – and getting without where fast. 2) the good news is that with our recruitment system 24/7. internet has given us new capabilities as a network marketer and allows us to leverage technology to build better, faster and easier than ever. you can make money and get new customers at clicking a button with email marketing... get your message to thousands of people for free. You can use googles, facebooks and other platforms such as your personal mind reading machines so you can direct people to precisely search for what you have. you can turn into a global empire in months with international advertising, people in other countries may not be able to join your opportunity, but they can still use your experience and are willing to pay to learn from you. This is called monetizing your list. We'll talk about it later. you can educate and continue to build your customer list 24/7 even while you sleep. - You still excited? I hope so because the use of attraction marketing is how I built one of my downlines internationally. a downline 9 levels of depth with people from all over America, Canada, Europe, Japan, Australia, etc. you will learn how to brand yourself & create a unique business around your efforts mlm the broken network marketer thinks that their activity revolves around their products and opportunities. focus on how "big" their products are. the rich network marketer understands this: the real corporate asset you own is not your product orthe real and most valuable asset within your business is the TU. This is your enthusiasm, your confidence, your vitality and your general solution. Through Attraction Marketing, you will learn to serve others first, solve problems for people before, build relationships before......and provide current value. All this adds up to a situation where you saw yourself as a highly valued person people who want to buy from and join in business. Chapter 3 within the Attraction Marketing Formula teaches you the value behind this way of doing business. Building your brand Solves The Erecent MLM Fiamme I am about to teach you something here that most people in the industry try to polish and hide from you. While network marketing is a surprising business system, there are flaws in it. One of the biggest flaws is something Perry Marshall brought to my attention a few years ago. He said network marketers are told how important the duplication is a very bad thing in marketing. He did a great point when he said that anyone doing very well in MLM is doing well because they are not doing what everyone else in the company is doing. They're successful because they're not duplicating. I'm UNIQUE. He didn't call it Attraction Marketing, but what he was describing was exactly that the successful MLMers have a unique energy, voice and story to tell. Within the Attraction Marketing Formula, they teach ushow to present this unique voice and history. Chapters 3 & 4 within the Attraction Marketing Formula give you excellent basic information that reads your mind as follows within Chapter 5. Chapter 5 is where you learn exactly how to implement your Attraction Marketing system. It's a system that helps you: Find people already interested in what you offerProvite them a piece of value in advance to get the conversation goBuild a relationship with your prospects Offer solutions to problems they have (your MLM products, opportunity, or even other affiliate offers you can earn money with)Collect money from sales and insert your prospect back into your pipeline for future sales (increase your exponentially income over time) The marketing Formula is the same used within any activity of 6 and 7 digits that you can admire. All you have to do is implement this same system in order to achieve the same success results. Here is a snapshot of this concept from my AMF copy: The real key to this strategy is learning how to earn income even when a person is not ready enough to buy your major MLM products or join your business. This strategy is taught within the Attraction Marketing Formula and solves 3 major problems: 1) A potential future society to shut down Do not drink Kool-Aid and become naive for network marketing realities. Sometimes, these companies are closed by regulators. It didn't happen once.I, but twice! Just like this, two former mlm companies I was part of were closed. Many people have lost a lot of time, but because I was oando attraction marketing and I had created confidence with my perspectives, I was able to move gears and continue. is painful when this happens. If that happens to you, which group do you want to enter? the group who made the traditional method of convincing and begging marketing, and now has nothing to show for all their effort? o, the group that has learned attraction marketing and now has a large group of perspectives that know you, like you and you trust enough to build with you somewhere else? 2) the need for an immediate cash flow through fast sales since chapter 5 of the attraction marketing formula teaches you how to earn money before anyone joins your network marketing business, you will benefit from getting the ability to bring fast cash flow into your bank account. one of the hidden costs per mlm is the acquisition of the customer. also ondo free methods like social media have a cost (time.) how much is your family? do you remember the benefit of releasing any guilt or frustration to not be with your family because it is sucked when using traditional perspective methods? learning the system taught in chapter 5 is the key to the quick money needed to pay the next cost associated with the acquisition of the customer: 3) how to find money to invest in proper paid advertising for yourmlm biz is huge. attraction marketing is a system that basically results in prospects of payment to become an advantage for your primary network marketing formula and go through chapter 5, you are going to know exactly how to accomplish something that most mlmers never learn. Something that keeps them green and without success. .you are going to learn how: attracting people already suffering from products solveoffering them small products at price (linked to your primary and easy to sell business because of the small and years. Chapters 7 and 8 take you by hand and teach you. Step by step. how to set up your internet empire. The beginning of your base, without a homebase that own & control, none of the marketing methods of attraction work. In particular, this means that you will set up your website (or blog, at any time you want to use). Chapter 7this configuration but is not without a defect. I will cover a couple of important negative issues you need to know about the Attraction Marketing Formula, so don't skip that part below. Chapter 8 of Attraction Marketing Formula details how to configure a very important piece of your blog: -How to capture the email addresses of your prospects so you can start building your list of international perspectives.- Let's move in why this is important for your success as a network marketer... You'll find out how to use email automation to grow your list, reports and bank account Pay close attention here... because... That's where your money is! 90% of all the money you will get within your online network of marketing efforts are going to go through the followup. All this Attraction Marketing Formula Review. I have allied the importance of building relationships and trust. Email marketing automation is where money is because about 10% of all your prospects are ready to buy immediately after you have found it. Yes, even if your Attraction Marketing efforts will attract people already interested in what you offer... a good 90% will need a little more information, building relationship or trust building before making their final decision to go ahead with you. Paying a lot of attention to chapter 9 within your copy of Attraction Marketing Formula, you will become a professional network marketer... a professional who finally kills all the dragons that prevent you from being Imagine this: 1) Every day, you have targeted leads that flow into your online sales funnel 2) Every day, you have immediate profits feeds your bank account and another % of these profits feed your online advertising 3) Your email automation system follows with every perspective individually while you are working at your job, eat dinner, spend quality time with your family, or sleep All above adds to a better lifestyle update In the end, you get what you really want: no more guilty feelings... no more frustration... a feeling of satisfaction and of elation as you see the look of pride in the eves of your spouse and your children to what you have done for them that is all, right? What does your new email automation system work out within your MLM Business? Solve all the following: 1) Remember when I told you over that Perry Marshall indicated some real negatives. regarding the network marketing system to do business? Another of the negatives I didn't mention above is this: Within your MLM business, you actually have nothing at all. Yes, I know that your company might have sold the idea of being your boss and all this, but please realize that you have nothing at all. when you are a representative for a network marketing company. Read your deal you had to agree to sign up. They can take yoursevery time they boundaries of their terms of service. And if that company is closed by regulators (remember, it didn't happen once, but twice!). then lose the entire business line you thought of "ownership". Building your list the way in which Chapter 9 teaches ensures that you are building the most important business assets of all and you OWN IT OUTRIGHT. It's all yours! 2) Your email marketing automation efforts give you complete control over your income within your primary MLM business and outside of it. You will have full control because you will never wake up and ask who you will have an ever-increasing list of perspective that builds on autopilot, builds autopilot reports, and makes sales for you on autopilot. 3) Exponentially allows you to increase your income because the possibilities here are endless: affiliate sales (resale of products that others have created)coachingsomeday, you could also create your own productsetc. This way of doing business allows an even more residual cash flow over and over MLM stuff. Do you want more freedom and money for a better quality of life and time with the family? This is how to accomplish it in a way that puts you in the driver's seat when it comes to owning income flows. Are there any negative aspects to Attraction Marketing Formula? Yeah. And in my mind, they're flashing negatives and they have to beto ensure your success. 1) research your nickel chapter 6 within the attraction marketing formula is all about how to look for your angle inside the niche your company mlm naturally puts you in. the information is good. However, I think it can be better. I think we can explain more clearly. This is why if you buy amf through the affiliate links that you will find within this review, I will tell you to a resource that does a much better job with teaching how to search your niche 2) Where is social media education? Another defect I have identified is that the attraction marketing formula does not bind social media in the mix as well as could. Once purchased, I will provide you with solutions for this. 3) the piece of internet you have what it does, is make sure to create the hub (which you own) to help you fuel your social media efforts. This is done within Chapter 7, which is responsible for configuring the system. your base of departure online, once again, excellent explanation about why you need this within your lead production process and online sales. but it could be simplified and simplified so it can be set faster. Once purchased through affiliate links on this page, I will send you a solution to this defect. By the way, I said above that buying through affiliate links on this page gets you additional bonus resources you will not find elsewhere. Yes, Ferny will send me some money to help you educate on amfenough to go to maui but enough to bring my wife to Applebee's). Frequent questions – fag section fag #1: I found another guy online saying that this stuff does not duplicate & I will lose my team to the technicians. Is there any truth?' with all due respect, this "other guy" is simply wrong to make a blanket statement like that. in my personal experience, do you know what we lose most people within the network marketing industry? We start losing most of them to the point where they realize they have ever known and try to sell them. We lose more people in our downlines after they make contact with the first people in their list of hot contacts and realize that people not magically buy or join as they were led to believe in the corporate opportunity meeting, they realize that the products are not right for everyone and not everyone wants to buy in a business mlm. back to your original question about duplication: back where I mentioned perry marshall above and his comments on duplication. one of the great negatives of mlm is that you have thousands of reps within your company doing the same things to be noticed in a busy world. they are all chasing people with the same corporate launch, is nasty locally when done offline, but it is exponentially bad online when your facebook feed is scattered with the same, "You have to check this out! is the best thing from sliced bread! You'd miss it if you don't. Now! Gross. Think of this critically and you'll see that no one answers this stuff. Actually, some do: the crowd of get-rich-quick does... people who do not want to work in a real business. You can't build a real deal with people like this. Using Attraction Marketing and creating a personal brand, UNIQUE online is the way to do it differently from all people within your company screaming and screaming the same, tired stuff that is not effective... ...it is not effective because they are not creating TARGETED tracks... people already interested in what you offer. You can create those targeted doors within your attraction marketing system (and teach your downline how to do the same with your unique THEIR voice). So, the answer is: you do not want to duplicate. You want to stand out like the go-to-person of your industry. And the "techniality" are all things that anyone has the will to learn will learn. It is not so difficult to get an online presence and running today. Five years ago? Perhaps, but today the tools are simple enough to use. FAQ #2: If I teach my downline how to create an online presence, then am I creating competition within my team? Good guestion. The answer is "no" and this is why: Each niche is large enough to accommodate more, more marketers. Each niche selection course out there says it is wise to enter a market where people are already "we" making money. The keyhow you create your own unique angle. For example, let me choose an MLM company out of the hat... Let's say Arbona, for example. Arbonne has three main product lines: make-up, nutrition and skin care. Let's say you joined Arbonne because you're excited about makeup and what they offer there. So, you create a unique sales proposal (USP) around how to teach women in their 40 and 50's how to apply makeup, how to buy the best type, etc. One of your downline members is 22 and decides that will build his blog around teaching young women "ins & outs" makeup. Not only does he sell a lot of Arbonne products through Attraction Marketing on his blog, but he also becomes the next YouTube star makeup... sell even more product Arbonne (which overwrites).! You're both representatives of Arbonne. But you are both getting a slice of the makeup market that is unique and different. Other people in your downline may go this path into nutrition or skin care niches. The possibilities in QUALSI niche are ENDLESS in terms of drilling up to a smaller part of the niche, where you become experts of a specific group of people. The problem in network marketing is that everyone says they use the same company replicated websites. That's where everyone competes against each other. Using Attraction Marketing in the way I'm talking helps you and all your downline members cut out their unique slice of the market. I mean, heck, just look at how many "gurus" therein the niche MLM itself: Ferny Ceballos, Tim Erway, Ray Higdon, Brian Fanale, Mike Dillard, Matt Morris, Lawrence Tam, Eric Worre, Todd & Lea Rae, Jackie Ulmer, Todd Falcone, Michelle Pescosolido, Layla & Toby Black, Rob Fore, Adam Chandler, Tracey Walker... I could go on with the names. the point is that all these people (and more) have carved their market slice within the niche of network marketing methods taught within the Marketing Formula of Attraction to the niche your company put you in... Well, then it is all finished in domain terms for you and your people. FAQ #3: My company does not allow us to use the name of the company or the names of the products online. So, that means I can't do any of this attraction marketing stuff you're talking about, right? And you're wrong... thank you! 😊 Don't forget that the key principle behind Attraction Marketing is that you are first leader with value PRIMA to start spitting on how big your products or business are. Let's say you're in LegalShield, for example. Your blog and accompanying social media satellites will NOT yell at how big LegalShield is. Remember, this is the gross (and unsuccessful) way your replicated site does. Instead, you are going to educate your market first. Your market is people who need a lawyer, how to interview a lawyer, etc. Marketing works because you are ATTRACTING people already looking for what you offer, so educate them on some aspects of your niche, and THEN invites them to contact you... ... through a form on your blog, to subscribe to the newsletter, to call you, etc. If your company does not allow you to use the name of the company online, do not MATTER ONE BIT because you should not use your company name even if it is allowed. You are leading with you, your unique angle, and free education first. This is what builds the relationship and trust that you need to build with your perspectives. THEN, privately (through email marketing or through a private phone call,) you start educating these people - who have come to know you and trust - all about your products and business opportunities. FAQ #4: Is this really gonna work for me? Yeah. Attraction Marketing is a fantasy name for how every single successful online marketer sells ANYTHING. In a nutshell, the system is: Attract (people already looking for the solutions you provide) Teach (educate them about a small slice of your niche, which builds confidence) Monetize (when they reach you, educate them on why your product(s) and/or opportunity is their best option) Don't make mistakes: This system is not only for MLM. It's like everyone online is making their money. Choose any type of product sold online and watch how the most successful people are doing it and recognize Attraction Marketing at work. So, yes, he will for you until you study the Attraction Marketing Formula, put the strategy to work, and then continue to "work" that strategy over time. FAQ #5: Is there any cold calls involved with Attraction Marketing? Have you read QUALSIASI of this Marketing? Have you read QUALSIASI of this Marketing as taught within the Attraction Marketing Formula, you will never, ever need to worry about where your next sale product or downline member will come from... ...let only need to cold call anyone (or use the 3-foot rule at the local shopping mall). When done correctly, you will get a lot of sales and registrations from your online presence before even talking personally to anyone. And for those who need a more personal connection with you before buying or joining, the phone call is a HOT call. Not cold, not even hot. It is HOT because you have already built confidence and a relationship through your free online training this person consumed before your phone call. FAQ #6: Is Formula Attraction Marketing worth money? I said above how other resources teach attractive marketing for huge costs... \$5,000 and upstairs. I wrote this review of Attraction Marketing Formula because I personally own the course and used the information inside it to build a 9-level international downline. When you consider that your only investment is a cost of once that is equal to what the owner of a SUV dumps in their gas tank every week, yes it is worth it. I can.you who while I built that 9th level deep business I silently thanked Ferny Ceballos many times, as seen the results accumulate. FAQ #7: I see that it worked for you and others that give testimonials below, but will it work for me? I understand why you can ask. At the same time, I always works when done properly. "When done correctly" is the operational phrase. The question is whether the instruction you will receive within the Attraction Marketing Formula will work. The question you have to ask is if you take the time to put the job to allow it to work for you. If you don't, it won't work. If you do, it will work. FAQ #8: Is there a guarantee? There is a 30-day warranty. You have a full 30 days to consume information and start putting it in action. If, for any reason, you are not satisfied, simply contact support staff and will issue a full refund... I didn't ask questions. Formula Marketing Attraction Review: The Testimonials I have already told you about how the Attraction Marketing Formula helped me grow an international business of 9 levels. But am I the only one who helped me with this information? That's not true! Cesar Rodriguez, 11 years MLM Veteran Discuss Importance of Attraction Marketing Formula: Who should buy Attraction Marketing Formula? You should just buy this resource if your goals are: use the Internet to automate lead flow avoid insidious through smart business building invest less time on perspective and more time enjoying passive lead and income flow Here is a screenshot of my copy of Attraction Marketing Formula, where Ferny shows us the traditional pipeline sales process. The traditional offline way of construction means a great deal of your time is spent personally making perspective calls to first get a perspective. Then, your time is spent personally educating your perspective on why they should trust you and buy or join. Then, your time is spent personally investing hours on successive hours to close the sale. Learning Attraction Marketing allows these steps in the process of becoming automated. If that's what you want to set, then you're a good candidate to buy the Attraction Marketing Formula and end up happy with your decision. Who should not buy the attractive marketing formula? If you do not want to invest time learning Internet marketing and then apply it to your network marketing business, then do not purchase this resource. Some people want to continue building an offline list and invite perspectives to local parties or dating opportunities. They enjoy 10n1 interaction with others, perspective of person and follow on the phone. If sowant to build (and there is nothing wrong with this!), then Attraction Marketing Formula is useless in terms of teaching offline marketing methods. If AMF sounds like the hood of the tools you are looking for, then Visit my AMF discount page... ...grab your copy & collect Ouick Action Bonuses, including LIVE Kickstart Training, FREE Coaching Sessions & Lifetime Access to Private Member-Only Community...
