Top sites to pirated books

This article has been translated from our Spanish edition using AI technologies. Errors can exist due to this process. The opinions expressed by the contributors of entrepreneurs are their own. Suppose you like handbags or watches, dance dresses or tie, maybe some exclusive tennis shoes, anything. Now you suppose to strive to reach it, months of hard work, months of savings to be able to access that exclusive model of anything, and when you finally buy it, what's the feeling? Did it happen? What if you realize what you bought is just a pirate version? What do you think the feeling is? Now suppose that from the beginning he bought the article knowing that it was pirated because it was not enough for the original. In both cases, we will have to do an autoanalysis of why we want to impress others by showing that we can achieve what most of us cannot, and above all ask ourselves if this attitude is carried out in other aspects of our lives, since when consuming this kind of objects or experiences, it is not objects or experiences in themselves what we seek, but be seen with it. That is why we quickly publish our purchases, our travels, our couples and our meals on our social networks. Read more: 7 dogana of successful people May we be stubborn to realize experiences, partners, situations, things and general goals of life and that we are convinced that what we are looking for is happened and give everything we have to achieve, time, imagination, efforts, health.only to realize when we realize that it is a fleeting success and does not bring us the lasting fulfillment we are looking for, that is, when we understand that success for which we fight so much is just a pirate success, a success that you have been sold out, since the idea of success is generally instilled by society, family, state, religion, school, friends or enemies. What others think and tell us is important. Read: Neuroscience tells you how to hack your brain to succeed And it is that as in any market where piracy abounds, the success of pirates is also sold and purchased on all roads of any city in the world. As you behave, as you act, as is your interaction in social networks, what is your public presentation, in what you invest your time and energy in, and what is the concept of success that is based on these efforts. We have this linear construction to study, get a job, promotions, entrepreneurship and more and more generating more money, buying a house, a car, a good partner and having children who reproduce our lifestyle... what everyone tells us is happiness and success. And yet... Do you know exactly what a successful life means to you? It is vital to know, since you imagine finally reaching the goals you thought would give you success and only lead to a pirate success. And it is that within this explicit daily maelstrom we never stop for a moment to ask ourselves what would be a happy life for us,a successful life means to us, what would be a meaningful life, that when we die we can say: "Yes, I'm comfortable with what I did and I've loved my life. "More probably, what we do daily is not the result of this reflection. a failure of friends, family, cousins, colleagues or school appears, but to be happy, or vice versa, to be recognized as a very successful person even if within us there is sadness, confusion, conflict, lack, frustration and a sense of absurdity. Why do we need the approval of others? do we feel unworthy to accept? because if this is the motivation, no matter how much money, as many likes, how much pirate success we will achieve, it will never be enough. the external approval from these means will be only pirate approval. If you want to be a human, you have to live there, you have to dress like this, you have to go there on holiday, you have to buy this. to learn more: the importance of not overlaying things, and so we interiorize forms of success that are just an illusion and we are shaping our whole life or much of what we do. with damaged health, taking pills against pain and anxiety, drinking tons of coffee to wake up without realizing that the solution is elsewhere, changing habits, changing the social circle, changing thoughts, helping other people with our efforts, having really rewarding lives. and it is clear that this is not a glorification of poverty, much less a justification ofthat create and reproduce poverty in a large area of the world population. However, why is this relevant? because your entrepreneurship in the end must find a cause, your cause, you do not want to strive for years to find only a pirate success at the end, so make sure that whatever you perceive as success for your company, it is actually also for you. Why is the Congress of the United States trying to affect sopa and pipe? Because I'm a pirate. This is the simple fact of the matter: if piracy was not such a problem for American rights holders (publishers, broadcasters, content creators,) lobby as riaaa and mpaa would not donate millions of dollars to morally bankrupt representatives and senators and the online stop piracy act and protect ip act would still swim in the ether. despite the terrifyingly hyperbolic tone that some anti-piracy literature takes — that piracy is similar to dealing drugs, child slave labor, or shit like that — piracy obviously is a problem, although we do not agree on how big or pressing a problem is. but why is piracy a problem first? I have to tell you why I'm pirated. copyright is broken in its current form, copyright laws are broken. it varies from country to country, but in most Western countries the copyright law has devolved itself into a kind of sweet and evil beast. basically, copyright is intended to protect the creator of a job — whether it is a painting, a book, a video game, or a movie — to beOut. Thanks to the strength of the lobby, however, copyright law protects the interests of publishers and broadcasters. SOPA, which allows a publisher to point to a copyrighted job and asks that it be deleted from interweb, is the creation of lobby and associations, not individual artists. Let me give you an example of how copyright is meant to work. If I produce a painting and hang it in a gallery, the copyright ensures that no one takes a photo and sells or prints copies. If I produce official copies of my painting and sell them, you are completely free to do what you like with your copy. If you want to challenge him, you can. If you want to give it to someone as a gift, you can. This is what your money is meant to buy you. It is thanks to the copyright law that almost every form of digital content is now blocked with DRM. Games that are buggy, a pain to open and can only be installed on a computer; cloud-based movies you never really own; books and music that can be removed from a device or account at any time without notice. That's why pirate: When I buy something, I want to own it. I don't want a publisher or a broadcaster to dictate how or why or when I can use something I own. Digital distribution systems still suck in In recent years we've made huge steps in the field of digital distribution. Steam and iTunes are both fantastic, buying Kindle e-books is depressingly easy, and Netflix is awesome — but if you look closer, most of theseThey're still struggling. itunes is easy to go, but with the exception of music, all you buy is wrapped in drm. you can not burn an episode of glee in dvd and watch it on tv. the problem with netflix, of course, is that you never possess what you look at: as spotify, it's a service you have to keep paying if you want to access your favorite shows. then there is the question of timeliness. steam and the musical side of itunes do not have this problem — because they are the de facto way to release a game or an album — but have you seen how quickly dvd rip appear on sites like rapidshare or piracy bay? Have you seen how easy it is to download stuff from these sites? and you can burn your downloads on dvd! magic. That's why pirate: When I buy something, I want to be free to enjoy it as I like. I don't want to be forced to "borrowing indefinitely" or just be allowed to play a movie through itunes, on a computer. next page: games, movies and albums are too expensive
