Guardians users fight against United as a team until he faces their personal family problems, especially the meeting of Star Lord with his father, to be ambitious, to be a heavenly ego. A fantastic and interesting sequel to a great film that I had my doubts until I went to the cinema because I was a big fan of the first and was really concerned that it would not be his predecessor. While I think the first was the best film, I would consider a perfect sequel. Galaxy visitors. 2 does the right and enables us to get to know the characters a little better. What surprised me most was the decision to give Yondu more emphasis than Star Lord Chris Pratt's character. I thought it was a great choice; Michael Rooker really shines in this role and is the best character in the film. His arrow also has some really fantastic scenes. Star Lord is a bit late, which is positive, because we already know pretty much everything except his father, whom we discover in this film. Overall, the action was fun, the characters were fantastic, the colors were fantastic, it was a lot more fun than the first (this film is really a comedy with absolutely fun jokes, mainly Drax) and overall a delightful experience. He definitely fulfilled my expectations. To put it that way, I only have a few problems with this film. They don't spoil me with the film and don't annoy me that much, but at least. We all know the latest such great superhero films that are bad. And frankly, all of my problems start with the villains. I think the supervisors have followed this golden human film, which ultimately has no purpose in the film, if not "bad". I say badly because it is very questionable what your motivation is or who you are, and we just don't know that this is important to us. Everything you do is pretty funny and overcast and crew review The Trivial Guardians try to stay together as a team while grappling with their own personal family issues, most notably Star-Lord's encounter with his father, the ambitious Sky Ego. The Guardians struggle to stay together as a team while dealing with their own personal family issues, most notably Star-Lord's meeting with his father, an ambitious sky ego. meet my predecessor. While I think the first part was the best movie, I would consider it the perfect sequel. Galaxy Level 2 does the right thing by letting us get to know the characters better. What surprised me the most was that I focused more on the character of Yonduah than on Star-Lord Chris Pratt. I think it's a great choice; Michael Rooker is really great in this role and is by far the best character in the movie. It also has some really great action scenes with his arrow. Mr. Star is a bit off the beaten path, which is a good thing, because we already know almost everything, except for who his father is, which we will find out in this movie. Overall, it was fun, the characters were great, the colors are great, it was a lot funnier than the first part (this movie is basically a comedy with some totally funny stories, mainly Drax) and just a wonderful experience. It definitely exceeded my expectations. As mentioned, I only have a few issues with this film. I didn't ruin the movie, and they're not that annoying, but still. We all know the recent trend that big superhero movies like this one are bad badges. And to be honest, all my problems start with the bad guys. Throughout the film, the Rangers are being hunted by these golden men who, in my opinion, end up serving something other than the "outsiders". I say subordinates because it's very debatable what their motives are or who they are, and we just don't know enough about them to care. Everything they do is pretty funny and in the endHigh. Another problem I have is Kurt Russell's character. Now, I love Kurt Russell and was excited to see him play Peter Quill, but his hero just feels like a lot of exposition and doesn't go into too much spoiler damage, typical cliché. Its motivation is clear, but very stretched, and it's basically a movie like a historical look. However, these two things are not so good for me, the pleasures and adventures of our beloved heroes. And the ending gets quite emotional. After all, I think fans of the first film would have no problem using it, and I think the rest did everything right. Hopefully, they will be kept together as a team, solving their personal family issues, especially in light of the Star Lord's meeting with his father, the ambitious celestial ego. Now the team must help their leader Star Lord (Chris Pratt) uncover the truth behind his true heritage. Along the way, former enemies target allies and treachery flourishes. And the Guardians battle new, devastating threats to rule the galaxy. The Galaxy Guards first appeared in Marvel Comics in 1969 and had various versions. It's a film where we finally see the full power of the Guardians, but also the emotional resolve that has blocked some of them in particular. Peter Quill, who made the big mistake of plotting to capture Thanos, stunned by grief over the death of a loved one. Infinity War is also the first movie where we really see the Guardians alongside other MCU superheroes, and they don't disappoint - their funny, witty nature is what really drives this movie. 4. Avengers: Endgame (2019) Of course, Avengers: Endgame is next. As all of the Guardians were photographed with the Nebula and the Rocket, their characters are the ones seen the most in the film. They only appeared for Thor's character development and he ended up doing his thing and Thor saved Asgard from the other side. the Marvel movies in chronological order because that would make more sense as to what led to the current state of the Marvel Cinematic Universe.
