Mumbai, Maharashtra Trustseal Verified Verified Exporter Company Video Contact Supplier Request a quote Is useful? Yes À Ā¿ no no À Ā¿ watch Related videos Demonstration of Flow Wrap Machine Bosch Pack Pack Flow Wrapper with winding whichÀ flow feeder line is also known as a fin seal and wrapping horizontal bagging, is the process of wrapping a product in a transparent polypropylene film or printed. The end result is a flexible package with a shirred top and bottom seal. To put it simply whenever you open a bag of chips and wonder how they were fresh and maintained their crisis, this is down to scroll wrap. Materials used different packaging materials are used depending on the product. To create a unique design that matches your specific branding, up to 10 colors can be used in molded polypropylene film, transparent films for food use can also be used. Other materials are available as well; cellulose film and heat sealable and plastic laminates lacquered materials for paper or film. Examples of uses all kinds of food products can be wrapped flowing; Non-food products include things such as flyers, brochures, scratch cards, electrical and computer hardware. Our range of packaging products, including bread and cakes Sponge cake packaging lines packaging lines on biscuit board Packaging Packaging lines Automatic lines for Heap Biscuit biscuit packaging lines Packing for the end of packaging line and filling Unit Mulpack Unit Treatment Robot Vision and ABB Flex Pickers Multi format / horizontal tilting packaging flow machine specifications and requirements our KernPack horizontal flow packaging range of machine products vertical Dedicated for a variety of speed and application requirements: speed box motion a from 50 ppm up to 100 in modified atmosphere. Intermittent motion a speed up to 25 ppm. A Rotary movement speed from 200 ppm up to 1000 on automatic lines. Workflow Solutions By moving items to irregular shaped a different speed.
