Traktor DJ will use iCloud Drive to back up the BeatGrids, HotCues, BPM and key data of your tracks for security. If you use more thaniPad, iCloud Drive will keep data synchronizing between devices. - We addressed a bug that did not correctly show the number of tracks in your collection. We couldn't be more blown by Native Instruments' popular DJ app, tailored to iPad. With automatic track synchronization, simple touch-based controls, tons of embedded effects, and a useful guide for beginners, will help you to mix as a professional in no time. I like Traktor for the ability to load on Mixcloud, but now it will no longer access to it. What happened? I invested a lot of money in my Traktor S4 configuration. Initially I got this application on the iPad and it was fantastic. My MacBook Pro had been stolen so I wanted to use this as my primary DJ configuration and then switch to Traktor Pro when I could afford a new computer. I had decided to completely switch from my Ableton configuration to Traktor without ever using Traktor Pro to feel great things from other people. The intention was to have the iPad application and then be able to sync all my cue points to Traktor Pro when I had my new computer (which is how this was marketed earlier). Now I have the new computer only to find out that I can't sync any of my data from the iPad application to Traktor Pro even though this was promised when it was purchased. Manual synchronization options I found will not work because iCloud synchronization does not work at all (no Traktor DJ folder in iCloud). I'm at a loss and out of some serious money with my S4 and hard case. I am seriously broken by the heart on this andYou know what to do. free from the world of traktor! the ipad application is really amazing, but the software traktor pro so far is terrible and set cue points is much more boring than the ipad. so tldr: ipad app is great until you want to sync anything or have icloud drive work. traktor the pro software seems neglected and key features like cueing do not work as well as the ipad application. 1 star on the ipad app to sell me a giant lie. developer, native gmbh tools, did not provide details about its privacy practices and data management to apple. the developer will be required to provide privacy details when sending their next app update. developer website app support
