Utility support gigabyte

I found some other reference to use FreeDOS to flash BIOS firmware - but no one worked immediately for me. (Here and here for example) That's what I did to make it work. Scary warnings Take care when you update the BIOS firmware of the motherboard. If you flash the wrong file, or the power is cut during the process, there is a good chance you brick the motherboard. Just update the BIOS if you need to do it - typically, if the system is working with the current BIOS firmware then it is better to leave it alone. 1. Get BIOS firmware in my case, there are files on the Gigabyte website that have updated firmware. The latest firmware for my card is the F4 review. Then, download this ZIP file. It should contain three files: autoexec.bat Efliflash.exe J190ND3V.F4 2. Download FreeDOS We will need the image "USB Full" FreeDOS, from their website. Once downloaded, extract the FD12FULL.img 3 file. Write FreeDOs to a USB flash drive My machine does not have a CD drive (and obviously no floppy) - but it is able to start from USB drive simply well. Take the image file from above, and write it on USB flash drive with dd. First check that /dev/sdf is the right path for your USB flash drive! Sudo se~Down\FD12FULL.img di=/dev/sdf bs=1M 4. Copy BIOS flash file on USB flash drive Copy Efliflash.exe and J190ND3V. File F4 at the root of the flash drive. Next, we need to change FreeDOS scripts slightly so that instead of trying to install when you start, itrun the flash tool. Open autoexec.bat from your Gigabyte download - should contain a simple line like: Efliflash J190ND3V.F4 Now open the SETUP. The BAT file on the FreeDOS disk, and delete its entire content and replace it with the only line from the autoexec. bat files, i.e. FreeDOS SETUP. BAT should now contain the single line Efliflash J190ND3V. F4 (of course if you have a different motherboard or firmware version this line will change). Note that the FreeDOS disc will also have a AUTOEXEC. BAT file - leave this only, you need to initialize the system when you start from the 5 FreeDOS drive. Boot FreeDOS and BIOS flash Now you will be able to start from the FreeDOS drive. You probably need to change the boot order from the BIOS menu to do this, or disconnect existing hard drives. Once you download FreeDOS, you must automatically upload the Efliflash tool and flash the BIOS without the user input. Wait until this is done and confirmed, then restart the machine again in Ubuntu. BIOS has been updated. So, just to confirm it (because it was hard for me to really find anything about this motherboard on Linux) - the Gigabyte GA-J1900N-D3V works great with Linux, and the Mini-PCIe slot can be used for SATA controllers instead of Wi-Fi only as the product page suggests. (make sure you choose a SATA controller that has Linux support) Software License Agreement Terms included with any downloaded software will check the use ofSoftware licensed important agreement - read before copying, installing or oing, do not use or upload this software and any associated material (collectively, software) until you have read the following terms and conditions carefully, by uploading or using the software, you agree to the terms of this contract. If you do not want to agree, do not install or use the software. Note: - If you are a network administrator, the "Site license" below applies to the user. - If you are a final user, you will apply the "single oer license." - If you are a manufacturer of original equipment (oem,) the "licence oem" applies to you. - Yeah, you can copy the software on your organization's computers for the or of your organization, and you can make a reasonable number of backup copies of the software, provided these conditions: 1. this software is licensed for or only in combination with intel components products. the software oo in combination with non-Intel products is not authorized below. 2. You may not copy, modify, rent, sell, distribute or transfer any part of the software, unless provided by this agreement, and you agree to prevent unauthorized copying of the software. 3. it is not possible to reverse engineer, decompile or disassemble the software. 4. you cannot sublicense or allow the simultaneous or of the software from more than one user. 5. the software can include portions offered in terms other than those indicated here, as indicatededa license that accompanies those portions. Single licenses. You can copy the software on a single computer for your personal, non-commercial, and you can make a backup copy of the software, subject to these conditions: 1. this software is licensed for or only in combination with intel components products. the software oo in combination with non-Intel products is not authorized below. 2. You may not copy, modify, rent, sell, distribute or transfer any part of the software, unless provided by this agreement, and you agree to prevent unauthorized copying of the software. 3. it is not possible to reverse engineer, decompile or disassemble the software. 4. you cannot sublicense or allow the simultaneous or of the software from more than one user. 5. the software may include portions offered in terms as well as those indicated herein, as indicated in a license that accompanies such portions. oem licenses: you can reproduce and distribute the software only as an integral or embedded part of the product or as a standalone software maintenance update for existing end users of your products, excluding other standalone products, subject to these conditions: 1. this software is licensed for or only in combination with intel components products. the software oo in combination with non-Intel products is not authorized below. 2. the user may not copy, modify, rent, sell, distribute or transfer any part of the software, unless provided for in this contract, andagree to prevent unauthorized copying of the Software. 3. You cannot reverse engineer, decompile or disassemble the software. 4. You can only distribute the Software to your customers based on a written license agreement. This license agreement can be a break-the- seal license agreement. At least this license safeguards Intel's property rights to the software. 5. The Software may include portions offered in terms as well as those indicated herein, as indicated in a license that accompanies such portions. No other right. No right or license shall be granted by Intel to you, expressly or implicitly, in respect of any proprietary or patent information, copyright, work mask, trademark, trade secret, or other intellectual property rights owned or controlled by Intel, unless expressly provided in this Agreement. SOFTWARE AND COPYRIGHTS ORDER. The title to all copies of the Software remains with Intel or its suppliers. The Software is copyrighted and protected by the laws of the United States and other countries and by the international provisions of the Treaties. You cannot remove any copyright notice from the software. Intel may make changes to the Software, or to the elements mentioned, at any time without notice, but is not obliged to support or update the Software. Unless expressly provided otherwise, Intelgrants has no explicit or implicit right in Intel patents, copyrights, trademarks or other intellectual property rights. You can transfer the Software only if the agrees to be fully bound by these terms and if you do not store copies of the Software. LIMITED MEDIA WARRANTY. If the Software has been delivered by Intel on the physical media, Intel ensures that the media is free from physical material defects for a period of ninety days from delivery by Intel. If you find such a defect, return support to Intel for replacement or alternative delivery of the software as Intel can select. EXCLUSIONS OF OTHER ARRIES. ESCEPT AS PROVED ABOVE, SOFTWARE is "AS IS" without any declaration or implied will of any type of WARRANTING INCLUDING WARRANTIES of MERCHANTABILITY, NOT INFRINGING, O FITNESS for A PARTICULAR PURPOSE. Intel does not warrant or assume responsibility for the accuracy or completeness of any information, text, graphics, links or other elements contained in the Software. LIABILITY LIMITATION In no other information or its opportunities are available for any day (include, without authorization, the best products, business interruption, or more expensive information) that arise from the use of or inABILITY for the use of such images, and that the living conditions have been met. SOME JURISDIZIONI PROHIBIT EXCLUSION OR LIABILITY LIABILITY FOR WARRANTS AND IMPLIATES OR DAMAGINI CONSEQUENTIAL or INCIDENTALI. so the ABOVE LIMITATION NOT APPLICA. You may also have other legitimate adjustments ranging from JURISDITTON to JURISDICTION. Intel may terminate this Agreement at any time if violated itsAfter termination, you will immediately destroy the Software or return all copies of the Software to Intel. APPLICABLE LAWS. Requests arising from this Agreement are governed by the laws of California, excluding its principles of conflict of laws and the United Nations Convention on Contracts for the Sale of Goods. You may not export the Software in violation of applicable export laws and regulations. Intel is not obliged in any other agreement unless they are in writing and signed by an Intel Authorized Representative. RIGHTS OF GOVERNMENT. The software is provided with "RITTI DIRITTI DIRITTO RSTITITIT". The use, duplication or disclosure by the government are subject to restrictions as indicated in FAR52.227-14 and DFAR252.227-7013 or its successor. The use of software by the government constitutes the recognition of Intel's property rights in it.
