Numbering allows you to enter sequential numbers. In conjunction with the vertical selection edition, you can insert sequential numbers at the beginning or end of each row in the no which makes it easy to make an array of variable definitions. The Clipboard History allows you to insert previous text that you copied. The Find Matching Parenthesis/Bracket command allows you to jump between a pair of brackets. Scriptable macros for your repeated tasks. You can also create plug-ins that fit your needs. EmEditor can launch fast, and as soon as you to start typing. The Snippets plug-in allows you to insert frequently used text. The A AWord Complete plug-in can count not only words but any specified characters or words. The Status bar shows the basic information of the document such as the number of characters, words, and lines. The Messaging plug-in allows you to conveniently send a small part of your documents. The Marker feature allows you to highlight any keywords in your documents, and the multiple selection editing feature allows you to conveniently replace a same word with another word. EmEditor allows you to open very large file. EmEditor allows you to open CSV, TSV, or user-defined separator (DSV) files. You can sort according to column values (alphabetically or numerically), and you can configure sorting options such as stable-sort. EmEditor allows you to split or combine files. You can also use the bookmarked lines, or extract bookmarked lines to a new file. The Delete Duplicate Lines command allows you to delete identical lines in a document. No more, no less! Don't think you can do something else instead! Don't think you can leave out this or that step! Don't think you can make changes that I don't esplicitly say to make! Study this page carefully as if you were reading the instructions to disarm a tickling pump! You can't just try steps that look right for you, or that you're sure I wanted to explain even though I never mentioned them. No matter how special you are as a person, or how smart you are, or how infoolable and skeptical you are if I don't explicitly tell you to do something, don't do it! The versions of this system have been downloaded and installed correctly by hundreds of people in the last ten years. If it does not work on your system, this is almost certainly because you did not follow the instructions. Don't waste your extremely valuable time writing to me to complain that it doesn't work and asking me to think of some special suggestions to solve the problem. There is only one suggestion to correct the problem. Before installing: You will need a copy of your WPDOS program files from your old computer! If you have WPDOS 5.1, copy the entire WP51 folder to your new computer. If you have WPDOS 6.2, copy the entire COREL folder (or the entire WP62 and WPC62DOS folder) to a USB drive or any other disk, or copy the folder(s) to your new computer. (Allow a similar procedure if you have WPDOS 6.1.) If you copied to a USB drive, connect the USB drive, connect the USB drive to your new computer and make sure you can find it in Windows Explorer! Then download and the installer dosboxwp-setup.exe. (If you use Webroot or Avira Antivir as your antivarus software, you may be warned that the file is infected. To assign drive letters permanently, see the advanced techniques below. Troubleshooting: For a list of special keystrokes used by this system, click the Z: icon at the upper left of the DOSBox-X window and select Keyboard help... If your Windows system uses drive letter Z: for its own use), please contact me. Antivirus "false positives": Some antivirus software will (mistakenly) refuse to let the DOSBoxWP system run until you make an "exception" for it. If you can't figure out how to do this, you will need to ask your antivirus vendor for help. Do not waste your valuable time asking me how to accomplish this for your specific antivirus program, because I do not know the answer. Frequently-asked questions: Q. I'm a lot smarter than most people who visit your site, and I have a lot of experience with computers, so I was able to figure out that your instructions imply that I should perform certain steps that you never explicitly mention, and they imply that I should make changes to the instructions that you never explicitly call for. Anyway, I cleverly performed those steps and made the changes that you do this to me? Why did you imply that I should do those things that caused so many problems? How dare you imply such dangerous things? A A A. You, and you alone, caused the problems, because you insisted on performing steps and making changes that I never told you to perform. My instructions don't imply anything. They tell you exactly what you need to do - no more, no less. Next time, please follow the instructions exactly. Q. Your instructions are all wrong! Your software is incompatible with my system! You're careless and incompetent! You're wasted hours of my time! Please sort out all the problems I am still having, because those problems are clearly your fault entirely. - [Another hour later.] Um, wait again: I seem to have misread one of your instructions. But please tell me how to solve the problem I still have, because it is clearly your fault and your mistake. - [Yet another hour later.] Er, yes, wait again: I seem to have misread one of your instructions. But please tell me how to solve the problem I still have, because it is clearly your fault and your mistake. essential. Everything is working perfectly now. Never mind! Ã ÂÃ ÂA A. Thank you for your input. Q. I can't use your system! My old copy of WordPerfect 5.1 had a menu bar! It's worthless! And you have ruined my life! Ã ÂÃ ÂA A. First take a deep breath. Then, in WordPerfect, use Shift-F1, 2 - Display, 4 - Menu Options, 8 - Menu Remains Visible, type Yes, then F7. Now, wasn't that easy? How to use this system When you launch the DOSBoxWPxx desktop icon, WordPerfect opens in a window on your desktop. You may use Alt-Enter to toggle between windowed and full-screen mode. You can use Alt-Tab to toggle between full-screen WPDOS and other applications, but WPDOS returns to a window when you do. When you exit WPDOS, if a DOS screen remains open in the same window, then enter the command exit to close it. (See a separate section of this page for instructions on controlling whether or not DOSBox-X remains open after you close WPDOS.) When WordPerfect opens, its default directory when you press F5 will be the WordPerfect folder on drive B:\Ã Â (which is actually a folder is actually a folder on your actual hard disk as the default folder by using Shift-F1, Location of Files, Documents ohnamat o etnemirepxE .atelpmoc alet ed odom o arap radum añcov es osiva mes ravart i Aredop X-xoBSOD o ,laer ocisÃf rotinom ues od lexip od ohnamat o euq roiam SODPW me ASEV alet ed ohnamat mu rehlocse añcov es :evarg e etnatropmi osivA .ranoicnuf ed rarap ametsis o i Araf etnemlevavorp e ol a Azaf odnatnet opmet ues ¡Ãredrep etnematrec esauq a Acov, ametsis esse racifidom arap ogla rezaf etnematicilpxe ressid ehl o£Ãn ue es, otaf eD .ametsis esse racifidom arap ogla rezaf etnematulosba o£Ãret o£Ãn ue es, otaf eD .ametsis essen otiefe muhnen etnematulosba o£Ãret o£Ãn ue es cidrepsed etnematicilpxe ressid ehl o£Ã ue es ,otaf eD .ametsis essen otiefe muhnen etnematulosba o£Ãret o£Ãn ue es ,otaf eD .ametsis essen otiefe muhnen etnematulosba o£Ãret o£Ãn ue es ,otaf eD .ametsis essen otiefe muhnen etnematulosba o£Ãret o£Ãn ue es ,otaf eD .ametsis essen otiefe muhnen etnematulosba o£Ãret o£Ãn ue es ,otaf eD .ametsis essen otiefe muhnen etnematulosba o£Ãret o£Ãn ue es ,otaf eD .ametsis essen otiefe muhnen etnematulosba o£Aret o£ of An ele - eled ortned odatucexe ajes eug amargorp reuglaug me adidem an otecxe, reod iav of An ele - eled ortned odatucexe ajes eug amargorp reuglaug me uo X- xobsoD o moc rev a ogla ahnet eug adan etnematulosba met of An EMAT ele - eled ortned odatucexe ajes eug amargorp reuglaug me uo X- xobsoD o moc rev a ogla ahnet eug adan etnematulosba met of An EMAT ele - eled ortned odatucexe ajes eug amargorp reuglaug me uo X- xobsoD o moc rev a ogla ahnet eug adan etnematulosba met of An EMAT ele - eled ortned odatucexe ajes eug amargorp reuglaug me uo X- xobsoD o moc rev a ogla ahnet eug adan etnematulosba met of An EMAT ele - eled ortned odatucexe ajes eug amargorp reuglaug me uo X- xobsoD o moc rev a ogla an ecerap ametsis esse omoc arienam a raretla arap EMAT o rasu odnatnet osoilav opmet ues ecidrepsed of ASEV arap ocifiÃrg odom o eretla e abixe, 1F-tfihS esu ,roiam rotinom mu revit aÃcov es saM ;potpal ed salet sad airoiam an jÃraxiacne es ossi eugrop 867x4201 ASEV o asu ,odÃubirtsid emrofnoc ,ametsis esse ,ocifiÃrg odom o araP.X-xoBSOD o arap of Araba alet ad ohnamat o raretla arap oxiaba of anetsis etse :levÃssop of Ase anu rireferg acov eS .sahnil 34 ed otxet ed alenaj amu me odaicini ©Ã ametsis etse :levÃssop of Ase anu rireferg alet ad ohnamat o raretla arap oxiaba a per otxet ed alenaj amu me odaicini @A ametsis etse :levÃssop of Ase anu rireferg alet ad ohnamat o raretla arap oxiaba of a edutse , otxet ed alenaj amu rireferg alet ad ohnamat o raretla arap oxiaba of a edutse , otxet ed alenaj amu rireferg alet ad ohnamat o raretla arap oxiaba of a edutse , otxet ed alenaj amu rireferg alet ad ohnamat o raretla arap oxiaba of a edutse , otxet ed alenaj amu rireferg alet ad ohnamat o raretla arap oxiaba of a edutse , .sosrucer sortuo snugla e aicnªÄrefsnart ed aer;Ä ad acort a ,o£Ässerpmi a moc adil euq onalp odnuges me odatucexe ©Ä amargorp mu ,ametsis etsen odatucexe and ©Ä odnamoc ed ahnil ad sortem¢Ärap sod mu lauq on asem ed ohlata mu rairc edop aÃcov, avitanretla omoC .sodpW screen before you start working on important files! Porto menu and type in LPT6). If you make this change, then a few seconds after you'The impression command on WPDOS, a list of installed printers will appear and you can select what you want. Remember: No change the name of no printer driver and try to select your real printer from WPDOS! Just leave the system exactly as you found it! I really want to say that! Be sure to understand this! Look at your heart! If you find an uncontrolled impulse to change the printer name or use a different printer driver, stop now and don't try to use this system! No wonder! It is not as visitors without no. supplied with the system. (One of one of the no realm! Any Windows printer, but if your standard printer is a PCL or Postscript Printer - and you really know that it is a PCL printer or postscript - you can get a more rapid print and options more Flexible, customizing this system to print directly on your PCL printer or postscript. To achieve this, read and study the section on the advanced techniques below. You must almost certainly use the PCL printer driver on theboxwp. But if you usually use a postscript printer on WPDOs, or need a compatible output with postscript, use Shift-F7, select and choose the printer driver whose name starts "Postscript; An arbitrarily named file will appear in the Windows work area. Alternatively, use macro pdfmaker. This creates a PDF file in the same folder with the original file, the original name of the file and the .pdf extension. If the document is not named, an arbitrary name will be used and the PDF will be written e lautriv odigÃr ocsid on soir<sup>3</sup> Återid sesse rairc eved sam ,resiuq euq soir<sup>3</sup> Återid Use Shift-F7, select, copy, to create another copy of the custom PostScript driver you installed following the instructions in the note immediately above. (Please note that Copy command creates a new PRS file.) Give the new copy a distinct name
that includes "pdf" so that you recognize it later. Set the printer port in the new copy as the file name B: \ printout \ wp64pdf.ps (require very carefully). Finally, edit the macro pdfmaker. wpm existing so that it select the new printer driver instead of the supplied with this system. You will need to find out for yourself which part of the macro edit, because this should only be tempted by someone expert enough to understand what to do. Try this only if you already know how to edit the Macros WPDOS! Don't expect me to undo your mistakes! Additional note for spectacularly advanced users: you can install soft post-write fonts on a WPDOS printer driver, using exactly the same methods you used on your old system. Or you can copy your existing .prs file (and the .all file in which you installed the source information) in that system, but you should also copy the PostScript fonts in a directory. You should also study the note two paragraphs above that about installing a different PostScript printer driver. If you use the macro pdfmaker. wpm, you should also install the fonts in the printer driver euq euq revird mu arap etnetsixe revird ues raipoc omoc rirbocsed arap aicn<sup>a</sup> Agiletni aus rasu uo orcam an .esabftt o ratide arap otxet ed rotide ortuo mugla uo dapetoN swodniW esu e xoBSOD atsap a © Ata eugevan ;PWxoBSOD ametsis o eugilsed e SODPW aias ,ossi rezaf araP .sahnil 06 e sanuloc 231 moc mu uo sahnil 34 e sanuloc 231 moc odom mu ,rireferp es ,uo ,ahnil-66 uo ,ahnil-05 odom mu me erba ametsis etse ,o£Ãrdap roP :X-xoBSOD arap alet ad o£Ãrdap ohnamat o raretla .PWxoBSOD od atsised a Acov eug @Ata adacilpa ¡Ares 3As of Aşaudnoc ed atrac ad of Aşaudnoc ed atrac ad of Asis adacilpa ; Ares 3As of Asis adacilpa ; A edadinu ed artel amu mªÃt euq eder me sedadinu moc odasu res edop odot©Ãm etsE ).lanif hsalskcab o aulcni ªÃcov euq etnemetrof odnemocer ue sam ,ohnimac on atsixe m©Ãbmat hsalskcab otuo euq edsed ,lanoicpo ©Ã ahnil adac me lanif hsalskcab o aulcni ªÃcov euq etnemetrof odnemocer ue sam ,ohnimac on atsixe m©Ãbmat hsalskcab otuo euq edsed ,lanoicpo ©Ã ahnil adac me lanif hsalskcab O( â\potkseD\eocsoR\sepA§ÃarugifnoC e sotnemucoD\:Câ H tnuom \pmeT \:C G tnuom :olpmexe roP .emon ues me o§Ãapse mu moc atsap amu racifitnedi ªÃcov es sapsa esU .swodniW ametsis ues on atsap amu moc X-xoBSOD on edadinu ed artel amu racifitnedi ato a que to tide ortuo mugla uo dapetoN swodniW esu e xoBSOD/PWxoBSOD atsap a @Ãta A eugevan a medion ed soute few sous me satsap a medion ed soute few sous acte and in the sous actor of a medion ed sous actor of a medion of a metais of a medion ed sous actor of a metais of a metais of a metais of a metais and sous actor of a metais and sous a metais and sous actor of a metais and sous actor of a metais and sous actor and source and sous actor acto swodniW od satsap enoicidA !sorre sues rezafsed arap odaraperp jAtse e. odnezaf jAtse eug o ebas aAcov es etnemos ossi ratneT .ossid amica etnemataidemi ohlesnoc o odniuges ,orcam a arap rasu edop of conf. For example, to start Windows PDF viewer. You can run your default Windows PDF viewer of this system by experiencing the "Start" command described immediately above, or you can use the MUPDF open source program provided found in DOSBOX-X B:\Utile folder. Configure the WP shell Office If you use the installation option to install the support for the WP office shell, the installer will install the full Office 3.1 software (publicly released by Novell). You may need to manually configure the apps in the same way that you configure them when you used the shell on a real DOS computer. Abbreviation expansion software for medical transcripts and court reporters If you need to use an abbreviation expansion software for medical transcripts and court reporters. DOSBoxwp system so that WPDOS 5.1 works properly. You must have a copy of all the files in the abbreviation expander configuration you used on Windows XP or DOS, as described on this page. (Do not save these files by burning them on a CD! They won't work properly! Use a USB drive to copy the files or email them to yourself. Do not burn them on a CD!) In Windows, open an Explorer Window in the Dosboxwp \ virtualhd folder and create a folder with the same folder with similar name). Copy all files from your old expander configuration in that folder. The next step isimportant. If you have 8) go to the DOSBoxWP folder and start the system by double-clicking the ¢ÅÅÅDOSBoxWP-PlainDOS.exe¢ÅÅÅ file; do not use any of the commands with ¢ÂÂÂ51¢ÃÂA or ¢ÃÂÂ62¢ÃÂA in their names. This command will open a 25-line version of DOSBox-X at the DOSBox-X B:\ prompt. At the prompt; enter CD PPLUS2 or CD ST or whatever CD command takes you into your expander and then starts WP (the batch file may be named something PRDWP.BAT or STWP.BAT). You should be able to use your expander as your normally do. do.
