How to make a venn diagram FAQ In this Venn diagram, the similarities between the two presidents appear where the circles overlap, and the differences appear where the circles do not. You can use a Venn diagram to analyze the similarities and differences between any two topics. Simply draw two (or three) large circles and give each circle a title, reflecting each object, trait, or person you are comparing. Inside the intersection of the two circles (overlapping area), write all the traits that the objects have in common. You will refer to these traits when you compare similar characteristics. 0:00 6:05 Suggested clip Solving Problems with Venn Diagrams - YouTubeYouTubeStart of suggested clipEnd of suggested clip Solving Problems with Venn Diagrams - YouTube = n(A) + n(B) - n(A ∩ B) And so on, where n(A) = number of elements in set A. Once you understand the concept of Venn diagram with the help of diagrams, you don't have to memorize these formulas. A Venn diagram is an illustration that uses circles to show the relationships among things or finite groups of things. Circles that overlap have a commonality while circles that do not overlap do not share those traits. Venn diagrams help to visually represent the similarities and differences between two concepts.
