Page number format in word table of contents

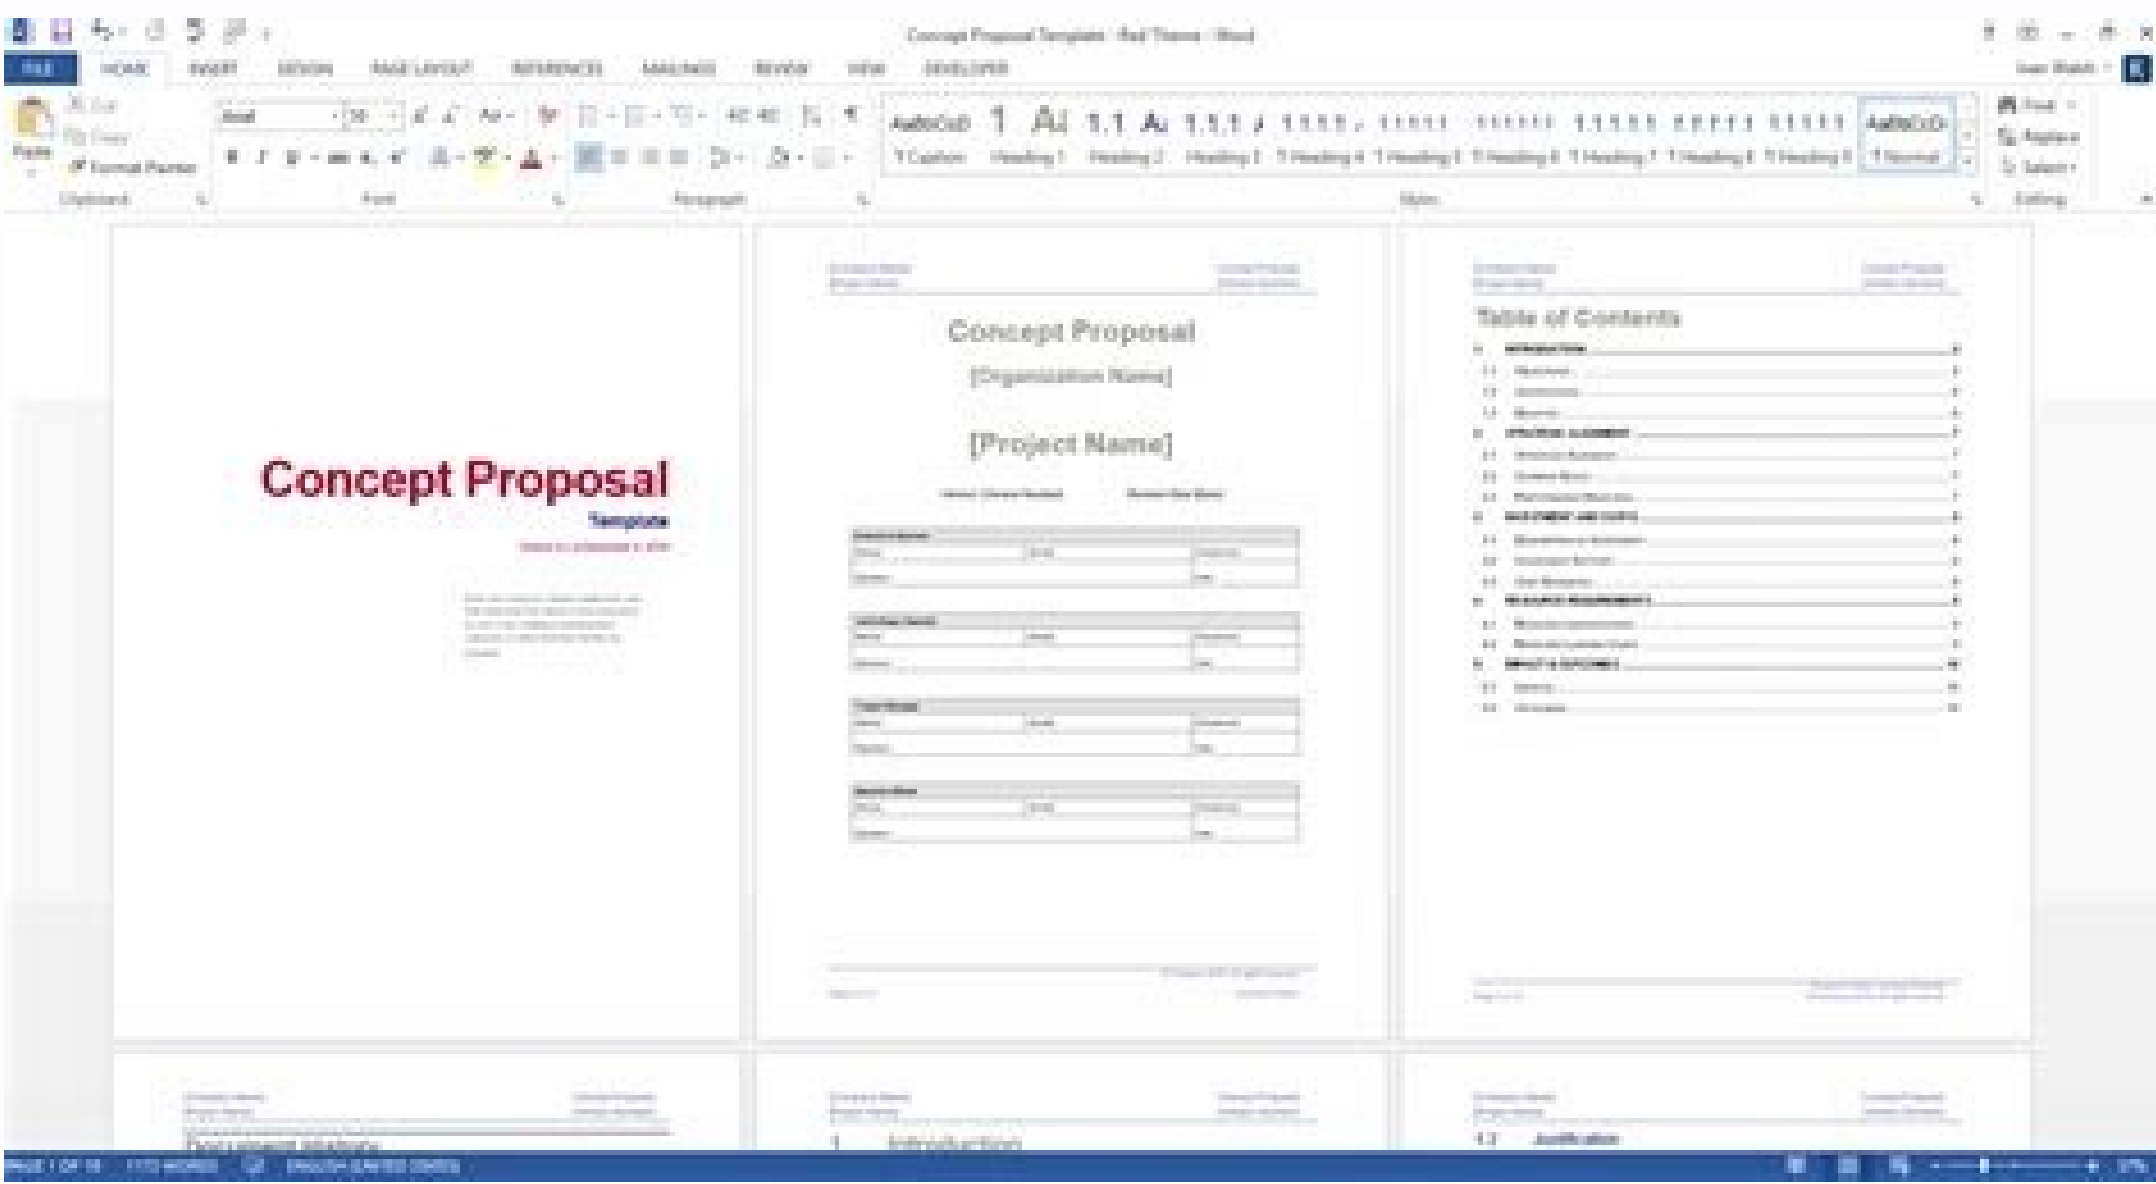

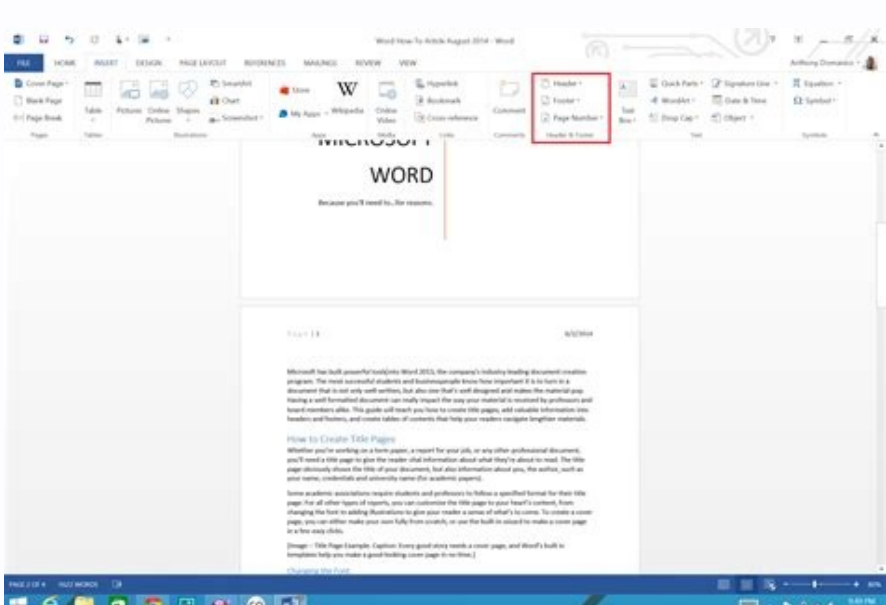

Table of Contents

Chapter 1	16
Section 1-1	16
Section 1-2	16
Chapter 2	16
Section 2-1	16
Section 2-2	16
Section 2-3	16
Chapter 3	16
Section 3-1	16

Change page number format in table of contents. Should page numbers start after table of contents. Do you include table of contents in page numbers. How to change page number format in table of contents word. Change page number format in table of contents word 2010.

You cannot automatically enter a prefix to your choice before the page number. It's not a supported feature. However, you can enter chapter numbers. It may not be what you wanted, since you gave an example of "VIS" which is not a number. But this mvp's article describes how to do this: For now, what you can do is manually change the content table (treat it as if it were regular text in a document and simply type in it) and add in the desired prefix. But when you go to regenerate the TOC table, delete your changes. It's a bit injured but I found a post from an MVP that said there's no way to insert your text there, so I tend to believe them (especially considering that I used Word in various versions for more than a decade and have never seen this behavior in practice). See Stefan Blom's answer here to learn more. If this is very important for your workflow and the issue will not go soon, you could probably do something with a Visual Basic macro that would go into the content table and manually edit the text to add the "VIS-" prefix as you want. If I decided to go that way, I'd ask about stacked up on how to write a macro to do it. The page count starts with the first page of your ETDR. Title page to the Contents Table: The page numbering begins with "i" in tiny Roman numerals (i, ii, iii) and is NOT displayed. Content table up to chapter 1: Basic Roman numerals continue to count and are displayed. Starting from Chapter 1: the page numbering begins with "the" and is displayed in Arabic numbers (1, 2, 3) through the rest of the document. Section breaks are used to control the numbering ofWith Word Show/Hide on, they look like this: ===Section Break (Next Page) ===== This page counting and page number display system is built into the template and should not require attention. While you work your document, inadvertently deleting or changing the numbering components of the pages may cause some problems. If page numbers are not displayed correctly, select the solution you need and follow the steps below. fix page numbers from "in the document body if you see page numbers back to " in the body of your document, it is followed by these steps to correct the problem: click anywhere on the page where the numbering starts from the top to the 128; if you are in the header and footer view, select the Insert tab, click the footer and click the footer change, place the cursor in the footer; do not select the page number; click the page number and then format page numbers, in the format window, click on continuous from the previous section and then click ok; repeat these steps to each occurrence of a section break or when the page numbers are returning to the 1; fix page numbers from start to end 1 follow the following steps a, b, c and d in order, or, use the edit request form to get help from an edit consultant (require eID/password), step a, check the required section breaks (content table, chapter 1) open your document in word. Click the Show/Shipping button (see a black paragraph symbol) to activate hidden formatting symbols, just before the content table page, check for a pause section, if there is a section break, jump to step 4. if the page number is missing, place the cursor right in front of the "~~~~~", click the page layout tab, in the paragraph section, select breaks, during section interruptions, select the next page, just before the beginning of chapter 1, check if there is a section break, if there is a break section,At Passo B below. If the section is missing, place the cursor immediately after "Chapter 1-" and in front of the first word in the title. Click the page Layout tab. In the Paragraph section, select Breaks. During section interruptions, select the next page. Step B. Fix the page numbers from from Page before the table of contents. Position the cursor at any point on the title page. In the Insert tab, select the most page size and click Edit More page. If you see a page number in the bottom of the page, select the number and press the Delete button. With the cursor at the top of the page, click Page Number and then format page numbers. In the page number format window, set the number format in I, II, III is 124Under the page numbering, select Start and set the number on OK. Section C. Set page numbers from the table of contents to before Chapter 1. Slide to the first page of your summary. If you are not in the header and page view, select the Insert tab, click Footer and click Edit More page. If "as before" or "Link to Previous" "It is visible just above the top of the page, remove it by clicking Connection previously 1 in the navigation section of the Design tab. Make sure the Design tab is still selected. With the cursor in the top of the page, click Page Number and then format page numbers. In the n format dialog Page number, set the format number in I, II, III, is 124In the numbering of the page, select Continue from the previous section. Click on OK. If no page number is displayed, enter it: click Page Number, then at the bottom of the page, then normal number 2 (centered) or normal number 3 (justified on the right). Section D. Fix page numbers from Chapter 1. Slide to the first page of Chapter 1. If you are not in view of the header and page size, select the Insert tab, click FOOTER and click Edit More page. If "how" o Ac a - ALink to Previous" is visible just above the footer, remove it by clicking Link Previously in the navigation section of the Design tab. With the cursor in the footer of the page, click Page Number and then format the page numbers. In the page number format window, set the number format to 1,2,3, a - | At the bottom of the page numbering, select Start and set the number to a - A1. Click OK. If no page number is displayed, enter it: click Page Number, then at the bottom of the page, then Normal Number 2 (centered) or Normal Number 3 3 When you're done in the Design tab, click Close Header and Footer. Feet.
