Answer the following questions on a separate sheet of paper.

- Explain how osmosis differs from diffusion.
- Compare and contrast active and passive transport.
- Identify two methods of active transport.
- State one reason that cells are small.

## Building Vocabulary

If the statement is true, write true. If the statement is false, change the underlined word or words to make the statement true.

- If a membrane is selectively permeable, it lets some but not all substances pass through.
- Osmosis is the process by which molecules tend to move from an area of higher concentration to an area of lower concentration.
- The process by which water moves across a selectively permeable membrane is called diffusion.
- Diffusion and osmosis are types of active transport.
- Passive transport requires energy.
