The last game in its deserved popularity due to the excellent gameplay, high-quality graphics and wonderful music. In the eighth part of these components brought to a fundamentally new level, they have become even better. However, there are negative moments, but about them later. Now, different springboards appeared in the application, which provides the rider with the ability to perform stunts in flight. So, before takeoff, you can start to turn around, as a result of which the car will turn in the air. On curved jumps the car will make a barrel. As you can see, in Asphalt 8: Airborne, the developers have thoroughly gone from realism. Management has not changed, as before, you have the right to choose the keys, accelerometer, display steering wheel and some other control options. Cars in the application are licensed, there are almost all the most common racing cars. The game is pleased with its interactivity - your vehicles can break. On the basis of nine locations, more than fifty varieties of tracks are created, which become larger and add more branches. Now we mention two main drawbacks. The first is the imbalance of the single-player campaign. In the last part of the game it was possible to cope without additional purchases, now it is extremely difficult to do it. Opponents have more powerful engines and drive significantly faster. The developers are clearly pushing the gamer either to donate or to score points in multiplayer races. The second negative feature is weak optimization. Even on top devices, the application slows down noticeably, demonstrating a low FPS value. However, the last flaw was corrected with the release of many updates. Nevertheless, Asphalt 8: Airborne turned out to be a worthy continuation of the famous game series.
