Extract the contents of the zip file, double click the "setup.exe" file to begin installation, then follow the on-screen instructions. Step 11: You must verify the profile before using the application. Now go to the next section to learn how to install apps with AltStore. Next, you must enable the Mail plugin. Now click the AltStore icon in the System Tray, install AltStore, then select your iOS device. Mac os operating system: Download and install AltStore on MacOS Start AltStore. You can only side install 3 applications in total. Go to the General tab and click on Manage Add-ons. Step 6: Once installed, open the Mail app again and go to its Preferences. You can add as many Apple IDs as you want and easily select them whenever you want to install an app. Since many signing services run into issues with keeping apps signed for a long time, the best way to bypass this problem is now side-loading. Once done, the app should appear on your iPhone or iPad Home screen. Step 8: Now go back to AltDeploy and click the Start button to begin the application installation process. Read this guide to find out how. Once the IPA file is downloaded, open the AltStore app on your device and go to the My Apps tab. Before diving in, AltDeploy has some limitations such as: As of this writing, the tool only supports macOS. That's all you need to do to sideload and install IPA files on your iOS device! The process is pretty straightforward and once you get used to it, you can easily install apps on the go. Step 7: Tick AltPlugin.mailbundle plugin and click Apply and Re-Mail button. Windows: Download the latest version of iTunes from Apple's website (not Microsoft Store) Download the latest version of iCloud from Apple's website (not Microsoft Store) Download the latest AltStore for Windows. If you are here to learn how to sideload applications with AltDeploy, follow the guide below as we show you the complete process of sideloading any IPA file using this new tool. Applications must be resigned every 7 days. If you are on macOS Catalina go to the summary page of your iPhone in iTunes and enable Show this iPhone while on Wi-Fi. If you're not sure how to do this, go to this link to read the guide. You can now go back to the Home screen and tap the app to open it. Sideloaded apps are the process of installing apps on your iPhone or iPad using .IPA files using tools like AltDeploy. The software should detect and display the connected iOS device as shown below. My favorite thing about AltDeploy is that it saves your Apple ID and password so you don't have to re-enter it every time you want to install an app. Now browse and select the IPA file you want to install. Press the + icon in the upper left corner. It takes a few minutes to complete the setup. If this is your first time using AltStore, you will be prompted to enter your Apple ID and password to begin installation. Click Manage Add-ons. Unlock your iOS device and choose to trust the device if prompted. Click the Install button to continue, then enter your computer password when prompted. Step 10: AltDeploy will begin the installation process. Step 3: Click the drop-down menu that says "No file selected" and then select Browse. Installing iOS Applications with AltDeploy Step 1: Get the latest version of AltDeploy. Download AltDeploy Step 2: Connect your iOS device to your computer and open AltDeploy. Note: If you don't want to use your main Apple ID for security reasons, you can create an alternative Apple ID and use it. Once the app is installed, it will appear in the My Apps tab and you can open it from there or from the Home screen. Once installed, go to Settings> General> Profiles (or Profiles and Device Management), tap the profile tagged with your Apple ID, then hit the Trust button. On your iOS device, go to Settings> General> Profiles, tap the profile tagged using your Apple ID, then click the Trust button. AltStore starts installing the application. Anti-Ban supported. It will appear as an icon in the menu bar. A list of IPA files you downloaded will be displayed. To do this, click on Mail in the menu bar and then select Preferences. Cydia's developer Saurik said it will update the tool by December of last year, but we have now passed that date and no updates have been released. Follow the instructions on the screen to complete the setup. Cydia Impactor was the most popular tool for side loading apps, but the tool hasn't been working since the last few months. Now click the AltStore icon in the menu bar, click Install AltStore, then select your iOS device. Apps last 7 days and you can easily remove them from your device by going to My Apps in AltStore and then tapping the "X days" button next to the app. Now connect your iPhone to your computer. After the setup is complete, restart the Mail application. If you are on macOS Mojave, open iTunes and enable iTunes Wi-Fi sync for iPhone. Click on the AltStore icon in the menu bar and select Install Mail Plugin. It is the WhatsApp Plus mode of WhatsApp that comes with many more advanced and customized privacy features.
