# Creation and god

According to writing, God has created a skies and Eartha fully formed and working in six days, about 6,000 years ago (around 4000 BC). The context of Genesis 1, as well as other places of the Bible, placing that these days have been normal, days of 24 hours. Original creation God s was perfect, without death or suffering. Creation is in sharp contrast with evolution and incredulous thought. Furthermore, biblical creation supports many fundamental concepts in Christian theology. What's the best proof of creation? With Ken Ham from The new DVD answers 2 What is the biblical creation? Biblical creation is based on the Bible where God has created the universe and all that, as described in Genesis (Genesis 1: 1-2: 3 is the specific creation week if commonly created means of creating genesis 1-11) . The Creator had no matter, a great amount of time, energy, or anything else. He created from nothing in six-day literal normal length about six thousand years ago. Biblical creation is not compatible with the conviction that the world has just happened through an extensive, naturalistic, and the process of possibilities over many billions of years. Biblical creation supports the Bible as you enjoy the eye testimony of actual creation events since God was the only one who observed what happened right at the beginning. Furthermore, biblical creationists do not see me the Bible or the book of Genesis as a mythological or allegorical document. Instead, the Bible is rightly considered a historical document that records what is actually happened and is the only real history. The Bible teaches Creation The Bible teaches God created the universe. In the more verses both in the old man and in the New Testament, it is clear that God has created everything that has been done. Here is a small list (added emphasis): it is, in principle, God created heaven and Eartha (Genesis 1: 1). A for six days the Lord made heaven and earth, the sea, and everything is that it is in them, and the seventh day rested. Therefore the Lord has blessed the day on Saturday and made him Holy (Exodus 20:11). A, you are the Lord, you alone. You did the heavens, the heavens of the skies, with all their army, the earth and everything that is on it, the seas and everything that is in them; and preserve all of them; And the army of heaven loves you. (Nehemiah 9: 6) In the beginning it was the verb, and the verb was with God and the verb was God. He was at the beginning with God. Everything was done by him, and without him even one of the things he made It was Madeea (John 1: 1-3). A, since in him all things were created, in heaven and on earth, the visible and invisible ones: thrones, dominations, principaties and authorities e all things were created by him and for Hima (Colossians 1: 16). A, You are worthy, Lord and God, to receive glory, honor and power, because you have created all things, and for your will they exist and were created (Revelation 4:11). The biblical revelation is the key to understanding this World e including the world came to be. Opposite points of view are based on many assumptions, each of which is diametrically opposed to biblical hypotheses. But the Bible is the fundamental, irreplaceable source of information on the creation of the universe. Basic hypothesis of biblical creation biblical creation is based on the Bible both absolute authority. Several biblical assumptions are diametrically opposed to evolutionary and naturalistic beliefs, competitors religious narrative origins. Biblical of creation involves: The Creator God of the Bible exists. The whole universe, heaven, the spiritual beings created, and all life on earth originating at the time of creation. God has created all things in six days normal length of about 24 hours. God has begun to create without the use of any pre-existing issue. Creative Gods cannot be explained only in terms of natural laws: Né are subject to the limits above. The Bible indicates that life has a purpose.The Bible Bible That the God of the Bible is the designer of all things. There is a precise starting point of time, for Genesis 1: 1. The past is the key to the present. Death is the result of sin of the first human couple. The creation was negatively affected by man's sin. The current geological structures of the terrestrial crust cannot be correctly explained without resorting to the flood of noA. Life does not come from nonlife. The creation of living organisms (original types) has been completed during the creation week. Specialization and variations within the created types were carried out by creation. God created the Universe the first verse of the Bible tells us, A e a, ~ "around, God created the heavens and the earth" Genesis 1: 1). No other entity has done the world. God put his own book of property in the world in the first chapter of Genesis. Glorious work of God can be seen in what he did (Psalm 19: 1) even if the creation and animals suffer from the damn. He made the moon to orbit the earth about 240,000 miles away. He has made the sun for over 100 times larger than the earth's diameter. He made the stars, the closer Alfa Centauri, who is 25 trillion miles away from our planet. And he made our galaxy that contains over 100 billion stars, nebulae and star cluster. And this is not even considering the other hundred billions of galaxies of stars. The immensity of the universe is unimaginable ... and God has made everything. Creation in six days in Genesis God created the entire universe, including original plants, animals and first two people (Adam and Eve) on six days of 24 literal hours, no more than billion years. In the context of the six days of Genesis 1, the day of the word in Genesis 1 refers to days of 24 hours. Whenever the word day appears with A e a, ~ A A "Evening and morning" or with a number like A e a, ~ A "Sixthy, A e a, ~" refers to a 24-hour day. There is no biblical or scientific reason to be ashamed to believe in a recent creation of six days. God spoke clearly and honestly. The order of creation counts many Christians think that if we only take each of the days of creation as a figurative, we can harmonize the Bible with the pagan religion of naturalism / evolutionism / humanism and mix it with evolutionary ideas such as the Big Bang and a very old ground. But this seems only reasonable for those who reject the order of events according to Genesis 1 and buy in the order of events according to evolutionary models. There are good reasons to reject such attempts at harmonization: Big Bang Cosmology contradicts the clear teaching of the Word of God and undermines the supreme authority of the Scriptures and subform the Gospel that proclaims. There are also numerous scientific problems with the big bang. Faith vs. Science? Faith is required to believe in the creation or evolution. The members of both views make claims on an unrepeatable past that has not been observed by humans. The creationists also have the advantage of appealing to God (and the Word of him), who knows all things, was always there, he created everything, it's all powerful and cannot lie. This is why both models of creation and evolution compete under the category of historical science "using science to today to help confirm what we read the Word of God. The historical science (ie, origins) is distinctly other than operating science (ie, observable, repeatable), which is used to build computers, create vaccines or put men on the moon. Biblical creationists and evolutionists both have evidence of origin interpreting based on their convictions (starting points) On the past, both firmly within the domain of historical science. Creation vs. Evolution one of the most Challenges to biblical creation today is evolutionary ideas. The idea of evolution (ie organic evolution), Big Bang (ie cosmological and astronomical evolution), Abiogenesis (chemical evolution) and millions of years (geological evolution) does not fit the Bible because it is rooted in the religion of Humanism (s word mana) to a religion that seeks to explain the world without God. This graph illustrates the differences between creation and evolution from a biblical perspective. Creation: enjoy s Word Evolution: Mana's a word in the beginning God creA. . . A Any alleged God is not necessary; all things came about by natural processes without God. Enjoy s word is truth. No one else has any absolute truth (yet illogical to believe that this is the absolute truth). God created the universe in six 24-hour days some 6,000 years ago. The universe is formed over billions of years. God created all living things according to their species and told them to reproduce. All life has evolved from a single-celled organism. God creA man in the image of him. Man has evolved like any other animal. God created marriage as one man for one woman for life. The marriage can be what someone wants. God determines what is right and wrong. The man decides what's e s right wrong e if it's right or wrong there too. The man broke God's law and is guilty before him; only God is good. Man is a fundamentally Good A If such a thing as a Gooda still exists. Death, thorns, and disease are the result of Mana sin. Death, thorns, and the disease existed millions of years before man and the hero that drives evolution. The Bible is the starting point and the absolute authority in all matters. Those who reject God and the authority for him to do it falsely attractive to humans as superior Enjoy an authority which is arbitrary (and wrong!). Unbelievers must suppress the knowledge of God, in an attempt to try to challenge the word of him. Unfortunately, many Christians still choose to trust the word of fallible men more than the Word of God, which is never wrong. Science of evolutionists and creationists creating some old-earth (those who mix their Christianity with the evolutionary pagan story of a big bang, millions of years, and other evolutionary ideas) loads frequently that scientists who believe in a young earth did not degree real and do real scientific research that can be published in secular peer-reviewed scientific journals. It is a false accusation. Most fields of science were actually developed by Christians believe in the Bible. the creation researchers studied the biblical record and the world around us to understand the history that Goda's Word records. While some of their models were discarded as new data came to lighta that is to be expected in the world of science, other predictions were confirmed with force. Here are a couple of those confirmed predictions: Prediction Confirmed 1: Force Planets e magnetic fields Confirmed Prediction 2: Decay and Helium Release (RATE) Confirmed Prediction 3: radiohalos Transform sandstones Confirmed Prediction 4: Cold Material near Eartha s Core Confirmed Forecast 5: Reversing Eartha's best magnetic field cases a Proof e creation in a few words, the events of the past as the origin of the universe are outside the realm of science observable and repeatable. e biblical creation is true because the supreme authority on SUBJECTTo e Goda said so. e Because the Bible is true, we expect to see evidence of Goda's fingerprints all creation with him. Even the building blocks of life e dnaa is a confirmation of what we expect to find, because e God created all things. This Creator is revealed to us in His Son Jesus Christ, the Word and through him, the Bible. Science confirms the Bible The Bible states that God made distinct kinds of animals and plants. We observe today genetic change, but only within certain limits (ie, race cat usually childless for the kind of cat). The Bible says that all He came from Adam and Eve, Genetics confirms that all people are a racea. Human race. The Bible states that there was a universal flood. As expected today, we see billions of death things buried in layers of rock established by the water over the whole earth, which is a powerful confirmation of what we read in writing. T T WORLD OSNÁ e DOESNÁ e Sense without God There is no reason to believe in the right or wrong if the man is only chemical substances reorganized. As the Creator, God has the right to make the rules. The God of the Bible cannot deny (2 Timothy 2:13), which is the basis for the law of non-contradiction. A logical God and of everyone conscious has made us in the image of him, and that's why we can understand logic and knowledge and learn how a logical God supports the creation of him. A logical God has created our senses, so they are substantially reliable in a biblical worldwide vision. Of course, due to sin and curse, people sometimes make logical errors, have problems with detection, and so on. But the Word of God, who comes with the authority of God himself, is always right and the standard with which we can judge all the questions. If the universe did not come from anything and it has no meaning, then why do the laws of logic and laws of science exist even if the universe is random and always changes? Scientists assume that things will continue to work in the way they have in the past. But why? In a universe where there were no laws and then there were some laws that have changed (ie, to the big bang), why hiring the laws of nature do not win tomorrow? Why are the laws of nature exist if the universe is random and in the stream first? In reality, the secular world borrows biblical assumptions and usually do not pay it. Conclusion: Because biblical creation is important that biblical creation is important because of everything that involves. If someone denies biblical creation, they actually refuse some vital theological points at the same time. The opening chapters of the genesis and related creation passages teach different biblical truths including the power of God to create everything in the universe (Genesis 1: 1) the creation of all astronomical bodies including the sun and the stars ( Genesis 1: 14-19) The goodness of God in declaring everything that has done as A e a, ~ "Very GoodA e a, ~ (Genesis 1:31) Order of God in creation in a logical sequence in six days (Genesis 1: 3-31) The origin of all animals on Earth (Genesis 1: 20-25) God has created humanity in its image (Genesis 1: 26-27) The origin of death through sin (Romans 5:12) Suffering in the world due to sin (Romans 8:20 -22) The prefiguration of the Plan of God to save humanity through his son (Genesis 3:15), above all, a biblical creation was imported to the Lord Jesus: "But from the beginning of creation, God A e a, ~" male and femaleAa, a e e a, ~ A e a, ~ A e a, ~ A e a, ~ A e a, ~ (Mark 10: 6). Jesus taught that Adam and Eve were made in A e a, ~ A "Beginning of creation", not billions of years after the beginning. If T The Universe has billions of years, the declaration of Jesus was a lie . But Jesus did not lie. He said the creation, reasoned by creation and taught the truth of a biblical creation.
