a number tripled is increased by five	a number less seven
twice a number is at most 11	the quotient of six times a number and 13
twice a number is at least 11	seven less a number
three times a number increased by five is 12	a number squared increased by twice the number
three times the quantity of a number plus five is twelve	5 less than a number
double the difference of 5 and a number	a number diminished by seven
the product of 8 and a number is less than 2	the quotient of the sum of a number and 3 and 8
10 more than a number	6 less than a number is 14
the square of ten more than a number	a number less 6 is 14
10 more than the square of a number	6 is less than a number which is less than 14

Defining Word Problems: Translating Sentences to Equations/Inequalities Worksheet 3

Translate each sentence into an equation. Use x to represent the number.

- 1) Five more than a number is 17. _____
- 2) Five is 6 less than twice a number _____
- 3) If seven is subtracted from six times a number, the result is 10. _____
- 4) Ten more than number is 62. _____
- 5) The sum of three times a number and twelve is twenty. _____
- 6) The sum of a number and 7 is 35. _____
- 7) One-half of a number equals sixteen. _____
- 8) The sum of a number and thirteen is 22. _____

Writing expressions with variables

Grade 5 Word Problems Worksheet

1. A piece of ribbon is y cm long. Ashley cut it into 4 equal pieces to do her 4 sisters' hair. Write the expression for the amount of ribbon used for each sister.

2. Margaret has 16 yards of fabric, and she is making dresses for x dolls. Write the expression for the length of fabric used for each doll.

3. Olivia had 14 needles in her sewing kit, but she lost r needles. Write the expression for the number of needles in her sewing kit now.

Reading and Math for K-5

© www.k5learning.com

one - half the age of Lynn. If their combined age is 46, **how old is each person?** Steve is 14 years old, Janie is 4 years old.

let x = age of Steve
 then $x - 10$ = age of Janie
 then $2x$ = Lynn's age

Translating Algebraic Phrases (A)	
Name	Date
Write an algebraic expression for each phrase.	
a number k divided by thirty-six	_____
thirty-six subtracted from a number p	_____
the quotient of twenty-nine and a number k	_____
a number n plus forty-nine	_____
three divided by a number g	_____
the total of twenty-three and a number r	_____
the difference between eighty-two and a number m	_____
a number k added to twenty-eight	_____
twenty-eight more than a number d	_____
a number j multiplied by thirty-six	_____
a number p increased by eighty-six	_____
thirty-nine to the n^{th} power	_____
a number q decreased by eighty-five	_____
the difference between a number f and two	_____
the quotient of a number r and thirty-seven	_____
a number n minus eighty-two	_____
the product of a number s and eighty-five	_____
a number x to the power of sixty-five	_____
the sum of forty-three and a number r	_____
the product of fifty-two and a number v	_____

Translating word problems into algebraic expressions worksheet. Translating algebraic phrases. How do you translate words into algebraic expressions. Translating word problems into algebraic expressions calculator. Translating word problems into algebraic expressions worksheet pdf. Translating english words into algebraic expressions.
