Thank you. Vine are extremely happy to say that this is an impressive and very useful post. Everything works well but when I change gearbox datetime after receiving a new set of data from DB to tie the grid, I want to update some other sections of the page (out of grid bread) with data stored in ViewBag or Session or ... I need knwo when the grid reading method is completed Hello - I followed your code for Kendo Grid however I am not able to capture the line elements. New to Kendo UI for jQuery? In KendoGridWithCheckBoxV1 example this was exactly what we want. Hi Hasibul Haque, this question has confused me for a long time, but I can't find a solution. What is not: In Edit/Add new line once you select the date and select to Update, the pass to the corresponding data entity is 01-01-0001 and not the selected date. Thank you for responding, you can give me some advice for deep understanding Kendo UI, especially as detail Grid properties that maybe used. I'm very grateful. Usage: MVC 4, Kendo UI Web v2013.1.319 Below are the implementations I'm facing problem. I'm quite satisfied with your good work. Thank you for reading my post. I tried this, but when I upgrade the line, the second (dropdown) datasource is accessible, and not the ds of the grid. 2) Similar problem is with the built-in load model in the column. here is the date Change the model event of the drop down list toolbar: function datesChange() {valor var = this.value(), grid = \$("#grid").data("kendoGrid"); if (value) { shout.dataSource.read(); } } and here is the action that is read by Grid in every event of change of datestime: Public ActionResult Data\_Read([DataSourceRequest] DataSourceRequest for request, string date) {return Json(Data(date).ToDataSourceResult(request)); Private IEnumerable Data(data string) {.... Greetings Antonio in KendoGrid I am using ToolbarTo change the content of the grid based on the date of date selected by a downhill list control (Toolbar template). Hi Hasibul, nice article. If I change the type to Datetime? Hi, can you tell me more about the popup modification? In my code it shows only date/check time for 1st row and rest all rows is simply showing text box. Thanks in advanceAshish shrivastava software engineer Nothing beats a failure but a TRY" This is a great inspirational article. Can I use the grid to implement the custom table like this? when the grid data source uses Json only the grid content will be updated. The current task in my hand is giving problems even though (I suppose) I tried to implement them after reporting many blogs on how to reach them. I'm new to using Kendo and MVC. Thank you. When the data is less than 90, it works well otherwise it takes more time to load the data from the backend. Hi, thank you for reading my post. that is I need the reading method to be completed before the change Title method implemented. implemented.
