

I'm not a robot!

Most acidic	Underground soil	pH 0.0	These bacteria grow in caves. The most acidic soil is called the crevice where the most acidic acid, H_2SO_4 , is the most basic. Most acids within a pH range of 0 to 6.
Most basic	Soil	pH 11	Alkaliphilic bacteria are found in areas where bodies of water have evaporated and left behind layers of alkaline salt minerals.
Highest radiation dose	5 million radiis	Gamma rays	Gamma radiation kills a person. A dose of 1000 rad will kill a person. Less than 1 rad per year is normal, and zero rads is ideal.
Longest period in space	6 years	Bacillus subtilis	In a 6-year capsule that exposed test organisms to the conditions of outer space.
Highest atmospheric pressure	12000 meters	There are a few bacteria living at the bottom of the Mariana Trench, the deepest point beneath Earth's oceans. Typically, atmospheric pressure at sea level is 1013 millibar (14.7 pounds per sq. inch).	Typically, atmospheric pressure at sea level is 1013 millibar (14.7 pounds per sq. inch).
Salinity	30% salt	Halophilic bacteria live in water with a 30% salt content. By comparison, the salt content of human blood are about 3.5% salt. Fresh water has very little salt.	Halophilic bacteria live in water with a 30% salt content. By comparison, the salt content of human blood are about 3.5% salt. Fresh water has very little salt.
