Basic mcqs of ms office pdf.

Some Members suggest acupuncture for people with multiple sclerosis. If you stretch frequently, you can relieve stiffness and help you move better. Stress Management. For example: if you have dizzy or dizziness because of yours, your doctor can prescribe Meclizina (Antiverert) .If to cause you pain, your doctor may prescribe medicines like: Amitriptyline (ELAVIL) Carbamazepine (tegretol) clonazepam (klonopin) duloxetine (Cymbalta) gabapentin (neurontin) nortriptyline (AVENTL, PAMELOR) phenitoína (Dilantin) Pregabalina (Lyrica) if you have difficulty walking, the doctor if you have spastic muscles, which Can cause pain, muscle tightening, or hiking problems, the doctor may try one of these: Baclofen (Gablofen, Lioresal) Clonazepam (Klonopin) Dantrolene (Dantrium) Diazepam (Valium) Onabotulinum toxin A (Botox) Tizanidine (ZANAFLEX) Tremors, Clonazepam or Isoniazida (Laniazid, Nydravid) can help. With MS fatigue can bring, the doctor can give you Amantadine, Fluoxetine (Prozac), or ModaFiniil (Provigil). If you are depressed, the doctor may prescribe one of several antidepressants. The therapist can create an exercise program for you, or teach you how to use tools to help you move better, like walking sticks, skidets, crutches or wheelchairs. If you need help to dress, do things Around the house, or complete tasks at work, the doctor will probably send it to occupational therapy (OT). A € You learn to save energy and find tools that can facilitate daily tasks. Regular activity can help you feel less tired, improve your mood and help with the bladder and intestine function. Your doctor will know if the medicine is suitable for you based on your symptoms. This MS Office online test will be useful for examinations and competitive interviews. Q. Stress affects people in different ways.
