out of combat to instantly restore mana. In addition, it gives a small amount of magic resistance. The level 30 â 1 point on the presence of Mind Presence 31 ° 1 point in the fortitude Arcane Level 32 & & It is "2 points on the level of magic attunement 34 Âf â â" 1 point on levels of arcane mind 35 to 37 Âf â â" 3 points on levels of arcane instability
88 and 39 Âcââ" 2 points on arcane power at level 30, presence of spirit Become available which makes your next spell with a cast time of less than 10 seconds an instant spell. At these low levels, the damage component of the new frost can also be used to terminate an enemy and freeze another enemy to surround them with arcane missiles if you're
fighting multiple enemies. Learning Water Rank 9 conjures and Food Rank 8 conjures is more important, because these two spells unlock refreshment rituals on your coach. Can be used to damage groups of enemies or terminate them. At level 60, buy conjure food, conjure water, Frostbolt, Polymorph, Mana Shield, Arcane Missiles, Dampen Magic
and Teleport: Shattrath in the middle of Shattrath (Alliance and Horde). Arcane's mana efficiency is enhanced by his talent for arcane meditation, which allows 30 % of his mana regeneration to continue during combat. Level 60 is "1 point in the arcane focus levels 61 to 63 is "3 points in the arcane impact levels 64 and 65 is "2 points in the prismatic
cap levels 66 to 70 is "5 points in the arcane impact of magical absorption arcane explosion and arcane explosion, a new spell learned at level 64, a 6 % higher chance of crit. However, arcane missiles can still be interrupted by abilities such as silence, kick, earth shock or simply stun effects. However, this is still a great talent, as you will only fight
with Mana when fighting and not while traveling. However, it costs mana, so it is advisable to be used only when necessary, as you will have to regenerate the mana again. Other applications of blinking of etnemadipar etnemadipar sogimini setrof ratam arAP
adeuq ed onad o rative arap ofÂhc on retab ed setna ocuop odasu res edop Accelerate the matanca process, you can also conjure the arcane explosion, but be aware of the high cost of mana and pushback of spells that can come with this spell. On level 26, buy cold and Frostbolt cone. Arcane intellect and frost armor if you are losing your aura.
Arcane intellect and frost armor if you are losing your fans. It reduces the chance of Arcane Messages to suffer orthographic pushback of any attack by 20% by talent. The Arcana mind increases its intellect at 3% by talent point to a total of 15%. In the 68 level, buy invisibility, mana
shield and conjure Emerald Mana. At the level 28, buy the Arcane intellect, Mana Shield and avoid mana agate. Except for the last position of this spell, these gems cost more mana to do than restore, then use only the first four classifications if it really needed. Arcane explosion is its main speech AOE with the single target specification. Removes root
effects and most of you; You can use it together with Frost New to get away from enemies and you can use it as a tactical spell on dungeons to get out of the effects of the AOE or reposition instead of walking to a new position For several seconds. In the 56 level, Buy Frostbolt, Arcane Messages, Arcane intellect and Arcane glow. Your talents should
hook like the trees below. On the level 30, Buy Ice Armor, Ice Block, Arcane Explosion, Conjure Water and Teleport: Darnassus (Alliance) or Teleport: Thunder Bluff (Horde) in the respective portal trainers of the city. On the 65 level, buy combine water and portal: Shattrath in the middle of Shattrath (Alliance and Horde). Arcane instability will give
2% more damage and a chance of about 3% higher, which is also a quendish for its Power Arcane of Cowde Talent 40. However, Mana Shield also leads Mana So you may have to spend more drinking time. Also buy fireball on level 6, as it does more damage than a Frostbolt Frostbolt talents. For RAID or PVP content, it is highly recommended to
Respec in a suitable PVP or PVE specification. However, this ability is required to defeat the High Maulgar King in Gruul's Lair attack. At level 63, buy Arcane Blast. This spell is the Mage's greatest DPS magic in TBC, but also the most mana intensive. Use the mana shield in any situation where you could die. Teleport spells can save a lot of travel
time and makes learning new spells from your wizard trainers very convenient. At level 54, buy arcane explosion. After spending your points on arcane power, each time you get the compensating effect of arcane concentration, you will have an increased critical accident, up to 30 % at the end, for your next spell while Clearcasting is active. The
Arcane Fortitude will increase his armor by a value equal to his intellect, which is a very strong defensive talent for only one point of talent. A bit of disadvantage of this talent is that it will make your arcane missiles cost 6 % more mana, however, this is negligent given that you should now have some orthographic damage and intellect gear. To resist
more spells, this talent gives him 10 more periods of resistance versus spells, which work hand in hand with the effect of resistance - increasing armor and interior zones usually having more junk crowds than Azeroth. At level 38, buy arcane blast, cast Mana Jade and Frostbolt. The 65 CLEFTOOF level of food is also better than the 60 level food
Respec in a suitable PVP or PVE specification. However, this ability is required to defeat the High Maulgar King in Gruul's Lair attack. At level 63, buy Arcane Blast.
