Paper presented at the ISA Conference on Current Developments in Environmental Sociology, Woudschoten, the Netherlands, June.Yearley, Steven. 1991.The Green Case: A Sociology of Environmental Issues, Arguments and Politics. London: Harper-Collins. Google Scholar Page 2 This article is in the 31st percentile (ranked 160,650th) of the 268,986 tracked articles of a similar age in all journals and the 25th percentile (ranked 3rd) of the 4 tracked articles of a similar age in The American Sociologist View more on Altmetric Altmetric calculates a score based on the online attention an article receives. Each coloured thread in the circle represents a different type of online attention. The number in the centre is the Altmetric score. Social media and mainstream news media are the main sources that calculate the score. Reference managers such as Mendeley are also tracked but do not contribute to the score. Older articles often score higher because they have had more time to get noticed. To account for this, Altmetric has included the context data for other articles of a similar age. what is the subject matter of sociology
