Sansa clip sport rockbox

+a -a autor v-loki neuling #1 erstellt: 22. Apr 2019, 21:27 hallo, ich habe seit jahren einen clip+ mit rockbox und bin überaus zufrieden damit. da man die aber nur selten und immernoch recht teuer bekommt, hab ich für meine tochter einen clipjam gekauft, in der hoffnung rock nach mühseligem versuchen hab ich dann mal hier im forum nachgeschaut warum das nicht geht. Ja, ich weiß, falsche reihenfolge. hab jedenfalls in mehreren beiträgen gelesen, daß auf dem jam(bisher) rockbox nicht läuft. meine frage also: geht das mittlerweile irgendwie? gruß [beitrag von v-loki am 22. Apr 2019, 21:29 bearbeitet] ejc-pur stammgast #2 erstellt: 07. aug 2019, 22:26 nein, das geht immer noch nicht und wird vermutlich auch so bleiben, ich nehme a. dass im sansa clip iam ähnliche hardware wie im sansa clip iam ä hilft nur, den clip+ pfleglich zu behandeln, damit er möglichst lange hält. a person who has no right to an old age pension. My group is favorable. foren archiv strona główna ogólnie forum ogólne sandisk clip sport rock box strona główna ogólnie forum ogólne sandisk clip sport rock box would be forgiven for not having understood that there is still a group of difficult people out there carrying around dedicated mp3 readers. while they were all anger a decade or Since then most consumers have moved to use their convenient dandy pocket supercomputer to play their music. It also controls every other aspect of their personal life and finances, of course. Although this is another story entirely. But as explained [Conno Brooks], there is a group of open source fanatics who prefer to store their jams on devices running the Rockbox firmware. Only the problem is that some of the players compatible with the desirable Rockbox are of the golden age of the dedicated players, and are not becoming younger. In a recent blog post, he briefly spends his final success attempt to put a new battery made in his Sansa Clip+, a particularly desirable player who was released in 2009. There are some problems with the procedure that prevented it from being widespread, according to [Conno]. For one, the Sansa Clip+ is small and not easily disassembled without destroying it. Worse, 30mm x 36mm x wires, which [Conno] was supposed to be part of a certain thermal protection system. First he tried to remove the circuit from the modern cell, but something must be tripped because the resulting Franken-pack did not emit any tension. In his second attempt he simply ignoredthread, and fortunately the Clip+ did not seem to complain and started as expected. [Conno] says that there is a careful bending necessary to get the new package installed and the Clip+ closed correctly, and the device's operating time is a little decreased by the lower capacity of the new battery. But if it means another couple of years to keep Big Brother out of your digital media habits, he realized it's a worthy profession. We have actually seen some hacks now for the Sansa Clip line of players at this point, thanks to its second life contract as a dear open source; from a battery replacement a little less stock-looking, to add a line-in option. When you are sick of listening to Hanson's discography, you can also start what is perhaps the worst in the world of DOOM. Rockbox is a replacement firmware for a number of digital audio players. The project seemed to have vanished together with much of the audio-player market in general, but Rockbox has now returned with the release of version 3.14 "Over 4 years have passed since the latest release, and at that time we have been engaged to add functionality and bug fixing to give you the best Rockbox experience still on the widest range of goals ever." Support has been added for a number of devices, performance and battery life have been improved and several features have been added; see the announcement for details. © 2017, Eklektix, Inc. Common Sansa Clip Zip does not turn on or is not recognized by a computer. The selected song or the podcast does not sound. The device's stuck. Information on artists and albums does not appear for the selected song. Most of the problems with audio files can be solved by ensuring that the file you are trying to play is supported by the player and inserting the device in bulk storage class mode (MSC), uninstalling and reinstalling the device drivers and forcing the device to turn it off and then restarting it. If you are experiencing SanDisk MP3 player firmware is updated. The SanDisk Sansa Clip Zip MP3 player offers 4 GB of storage space and has an embedded FM radio receiver. SankDisSansa Clip Zip MP3 player does not turn on if the Sansa clip Zip battery has been completely drained while the device has been frozen or blocked, the device has been frozen or blocked, the device will probably not turn on when connecting it to a computer. To solve this problem, you need to put your device in bulk storage class (MSC) mode while connecting it to your computer to recognize it. You can put your device in MSC mode while connecting to your computer viathe following: Hold down the central button down, connect the device to the computer using the USB cable that came with the device. The device should turn on shortly after being connected to the computer to charge before unconnected to the computer when it is in standard mode, it is displayed under portable devices in Windows Explorer. When you connect your device to your computer in MSC mode, it appears under Removable Storage Devices. After disconnecting the MP3 player from the computer will no longer be in MSC mode. Computer does not recognize SanDisk Sansa Clip Zip MP3 Player If your computer does not recognize the device, first try to put the device in MSC mode as described above. If this does not work, try to control the device drivers by doing the following: Reconnect the MP3 player to your computer using the USB cable. In Windows, open the Start menu and right-click "Computer". Click "Manage" to open the Computer Management window. Click on the left-hand expansion box of System Tools and then click on "Device Management window. Click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and then click on the left-hand expansion box of System Tools and the left-hand expansion box of System storage. The device will be listed in one of these options. If there is a yellowpoint next to the MP3 player name, then there is a problem with the device driver. The driver must be uninstalled. To do this:Click the name of your MP3 player and then click "Uninstall". The device driver is now uninstalled. Click "Action" at the top of the program window and then click "Scan for Hardware Changes". The computer detects the device and reinstalls the drivers. If this problem occurs regularly, try to update the MP3 player firmware as described in the SanDisk Clip Zip Firmware Update section. Selected Song won't work If a song doesn't play on your Sansa Zip Clip, check the following: Check the file format. The SanDisk Sansa Zip Clip only supports audio files in WMA, WAV and Audible formats. You can be able to upload an audio file that is not in a supported format for the MP3 player, but it will not work when you select it. If your audio file type is supported by the player and still won't work, you may not have permission to play the audio file on the devices. As a result, if you purchased a file on iTunes, uploaded to five other devices and then tried to play that file on your Sansa Clip Zip, the file will not be played and will automatically skip to the next track. Sansa Clip Zip is frozen or blocked, perform a hard reset for the power button is located at the center of the left edge of the MP3 player. You can perform a hard reset by pressing the power button and holding it in place for at least 15 seconds. Perform a hard reset forces all programs that were open to close and forces the entire device, which should now work without blocking, at least for a while. Why My SanDisk Sansa Clip Zip Play Podcasts? The MP3 player plays podcasts, but the podcasts, but the podcasts loaded on the device must be in one of the supported audio converters available online that will convert most unsupported file types into a supported file type, such as Any Audio Converter. Sansa Clip Zip File Listed as an unknown album and artist This problem is the result of metadata for that is not filled in, which is common in songs acquired through peer-to-peer file sharing networks. Generally, if you buy an online MP3 or if you tear one of your personal CDs, the metadata will be filled automatically. You can insert metadata vourself by doing the following: Right-click the audio file you want to insert metadata to open a context menu. Click "Properties". Select the "Summary" tab. Click "Advanced" under the Comments box. Various metadata fields will be displayed, such as Artist, Album, Year and Genre. Click one of these files and enter datal want to be inserted for that particular audio file for that song from SanDisk Sansa Clip Zip MP3 player and upload the newly saved audio file to see the changes. How to Update SanDisk Sansa Clip Zip Firmware Most other problems with the SanDisk Sansa Clip Zip Firmware update adds functionality to the device and also addresses problems discovered in the device from the latest version of the firmware update. You can update the device firmware by doing the following: Download and install the Sansa Firmware update the device on your computer and then connect the other end of the cable to the SanDisk Sansa Clip Zip. Click on "All programs," "SanDisk," "Sansa Updater", and then "Sansa Updater" again. The Sansa Firmware update is available, it will be listed under Download. Click to check the left box of Firmware and then click the "Download Now" button in the bottom right corner of the program. A blue progress bar will appear under Firmware, displaying the progress of the download. Click on the "Finre" button after a screen is displayed confirming that the firmware has finished downloading. Unplug the USB cable by connecting the SanDisk Sansa Clip Zip MP3 player to your computer, the message will appear on the screen saying that a firmware update is currently underway. When the firmware update is finished, the device as you would normally. This article is accurate and true for the best of the author's knowledge. The content is for informational or entertainment purposes and does not replace personal advice or professional a a screen will appear that will say "The file format is not supported!" When I go to my laptop to try to delete those files that will not allow me to delete anything. What do I do? Hel[dorothy on March 30, 2020: they were not on my blood for a year. I tried to make my unit use all the possible things I did, but nothing works to make sansisk work again. What can I do? Donna Rosales on 13 March 2020: He always plays the same songs. He doesn't play everything he's downloaded. Daniel on November 17, 2019:Mine is blocked with the flower symbol on the screen and is not seen by the computer, even with the instructions given above in case it is not seen from the computer. What do I do, please? Kathryn Nowicki on 08 May 2019: Both my daughter and I have a plus sports clip. There is no The same playlists? max dalton (author) from greater st. louis, missouri on 10 February 2018: I am sorry. I do not blame you.alm260 on 07 February 2018: Max dalton, I haven't seen your answer since 13 months ago as I've never received a notification by email, but I've already stated that the player wouldn't come at all. So I had to throw him away. If my new sansa does the same, I will never buy another sansa again, tom on November 10, 2017: when I do sports I prefer to oare mp3 readers instead of phones. the healthy zip clip is the perfect solution for me. ray on February 27, 2017: when I try to jump a track that freezes, I restarted it but still does the same! max dalton (author) from greater st. louis, missouri on December 31, 2016: alm, does not turn on or the computer does not recognize it? If the computer does not recognize it you might want to try a different cable. maxalm260 on December 31, 2016: I did everything this page suggested and my computer will not recognize my sansa clip reader. the player will not come. max dalton (author) from greater st. louis, missouri on 07 October 2016: it may be necessary to reform it. help please on October 06, 2016:only says transfer. screen remains on 22 April 2016: My mp3 player only works the screen doesn't turn on and show anything. How can I fix it? roz on February 13, 2016: I transferred mp3 file to sansa zip. when I look at the internal memory of tshows up and can be played via PC. However, when I unfold Zip from PC, they do not show under Music or any other category on Zip and cannot be played. Max Dalton (author) from Greater St. Louis, Missouri on 03 February 2016: Is it lit? Does it work when connected to AC power? Roxie on 03 February 2016: only use for radio when walking, is fully charged but when I turn it on nothing happens BoB B on October 17, 2015: Mine is blocked to refresh your media even after taking off your SD card. PC and Sansa Updater will not recognize and there are no driver problems. I tried resetting the power button and power button and power button. No matter what I do, the refreshing media screen always appears when you turn on or connect to your PC. I can't reform it or anything. Mike on July 02, 2015: Sandisk Clipsport seems in isolation. The first symptoms were Playlist 1 which crashes on saving to. Now it opens to "File System Error. Restart the device or format for recovery" Can you help me? Bill Pollak from New Jersey on 04 February 2015: Hi. I just got a SanDisk Sport MP3 player. I connected it to the power supply and then to the computer. All I see on the screen is "SanDisk". Is that normal? what is my next step. Please help me. BillGary on 07 January 2015: I have a sansa sandisc clip 4 g. & that wants power on will be when u connect to a sourse of power, but when u disconnect anything what is the problem Ryan on December 19, 2014: I have a problem where my Sansa freezes in some points during some songs!'ll have to make a hard reset as described above. The problem is that from that point in that song and opens only in new songs seemingly random. Did I have a bad mp3 player or is this a bug that can be solved? nives on December 17, 2014: Hi! Can you check something and probably help? My sansa clip erased alone everything that was on it...and says that there is only 350MB left of space....but 0 files.... Is there any way to recover files? I'm traveling right now, and I can't upload files from my computer... Thank you! NivesBill on 28 September 2014; I'm trying to download the firmware, but he keeps telling me that the download failed to "try later", The problem I'm having that did the firmware search is: I'm no longer able to sync songs to it using Windows Media Player (on one of my computers). SoniaS on September 14, 2014; Thank you, It worked! I know I have a Mp3 player instead of a small brick, everyman 123456 on March 23, 2014; I realize the time is late, but I found a solution to the problem of the green screen during bootup. If you were smart about it, you have a local copy of your music on your laptop in about the same layout of the folders of the device, as I did. If you are lucky like me, connecting your device to your computer translates into the coming screen to show a connection, but no text appears on any screen. What worked for me: 1) Format the drive (subport everything), then 2) manually reinstall the firmware this reset to factory spec. You can then copy the music and return to the correct folders and return to rocking... Links for the manual installation of the firmware are here: (see method 2), fixing was from previous post here: ... Play on!kara on January 15, 2014: I bought the zipper of the sansa clip from Amazon for a Christmas gift. After a couple of days of use it would not turn on. So I sent her back. The New worked well for 4 days and now the screen is so dark that you can just see. I changed the brightness and everything. Is there anything I can do before I turn it back and go to a different band of players? krishna on 16 April 2013; I recently bought Sandisk ClipZip from ebay and after a couple of days, it is frozen. When I press the power button, nothing is displayed except the green screen !It's not even detected by the computer. Is there any chance to make it work? sonia on 21 January 2013:hi maxthanks for clear and detailed instructions...i'm also stuck on the screen "refreshing your media"...I don't understand your instructions to load batches of files. Does that mean less songs at a time? I'm a beginner in general hasn't uploaded any firmware update since I bought the zipclip a vear ago... Could this be the problem? I also had the will to not turn on and the computer does not recognize the problems... Is this a bad and buggy device? think about buying anotherbut all these problems give me a break.... thank yousonialooseconnection on 03 January 2013: I bought two zipclips trying to get one that does not lose sound connection when moving it! There is no sound when I push the jack to the inside, when I can get the sound that the jack falls out or loses the connection! What kind of product is this? They came from Amazon. Vidhya L da Chennai, India on 29 October 2012: Thank you very much. very useful. lav on August 11, 2012: can the sansa clip zip 4gb be blocked when not in use? I keep my pocket and I keep draining the battery while the button is accidentally pushed selenabee on May 18, 2012: Hi, Max. Thank you for your advice. I got a new clipzip and it looks stuck on the radio. I can't figure out how to change it (or even find) the music option. I miss my old clip! KimMax Dalton (author) from Greater St. Louis, Missouri on May 15, 2012: Hi, Beth. You may have a lemon. However, I would try to load lots of files to see if this solves the problem. My sister has one of these I helped her with, and we had no problem loading a smaller number of files. Better, Max. Beth on May 12, 2012: Thank you for all your advice! I have a problem. I bought a Sansa Zip Clip for my mother for the day of mothers (which is tomorrow... a little last minute!) and I uploaded it with 3 BG songs from MacBook iTunes 10 library Pro afterthe sansa in msc mode. blackened me a couple of times (although it is more than 60% charge -- I think I could have had the upper button pressed when I connected it -- forgotten there was a button trick sometimes. Now I'm stuck on the screen "Remake media." did not progress over 20% (blue bar) in 10, 20 minutes, and when rebooting turns right the screen then restarts, and returns to the same screen again. grr. was 3 gb too much for all at once? I'm used to ipods, but my mom's just sure she would never hate a mp3 player, so my brothers and I thought we'd start making small and not dazzle the big bucks to start, but she's pretty frustrating. I have now also updated it with the latest firmware via and is again blocked at the same refreshing point. I also added a podcast and deleted a song to see if it would change and not luck. I left it to cool off for over an hour. You think I have a lemon? thoughts? Thank you for your help! electricrelish on 17 April 2012: thanks max. Your article showed that my zip clip still worked. You prevented me from experiencing a lot of problems and disappointments. falero treat on April 15, 2012: good art paul on April 09, 2012: Thanks for this very clear instructions for troubleshooting. This device seems to be haunted that it has so many quirks. Good thing is notIt's the right size. Thanks again, Paulmixie on March 31, 2012: Hey, thanks for all the good information! I had an older style clip for years and loved it, but went belly on a few weeks ago so I exchanged in for a new ClipZip. The new widget lasted only a few weeks before it started freezing in the middle of a podcast, so it turned on only to a green screen. I traded it three days ago and the new one froze after less than 48 hours of use. He stopped in the middle of a podcast, so I turned it off, and now he won't turn on. It would not accept the rigid reset, it will not turn on when connected to the AC adapter, and the computer only recognizes it as external storage space. It tells me it has to be format. I tried the make-up of the MSC mode, but it gives me the same "must format the F drive" and "can not complete the format" error messages. I'm a little embarrassed to retract this time for the third time in less than a month, but I really can't imagine what I could do to these things to make them die so quickly. I'm just using it indoors and listening to podcasts downloaded through iTunes. Any suggestions? Max Dalton (author) from Greater St. Louis, Missouri on March 15, 2012: Hi Jerald. I'm sorry it took so long to answer. Can you be a little more specific about where you're hanging up? Best, Max. Jerald on March 09, 2012: Computer does not recognize SanDisk Sansa Clip Zip MP3 Player If you are device it works, but yourdoes not recognize it, first try to put the device in MSC mode as indicated in the Device section does not turn on. If this does not Right-click "Computer" on the right side of the Start menu to open a context menu to open a context menu to open a context menu. Click on the left-hand expansion box of System Tools and then click on the left-hand expansion boxes of portable devices and USB mass storage; the device will be listed in one of these options. If there is a problem with the device driver. The driver must be uninstalled and then reinstalled while trying to solve the problem. Rightclick the MP3 player name and then click "Uninstall". The device driver is uninstalled. Click "Action" at the top of the program window after the drivers. If this problem occurs regularly, try to update the MP3 player firmware as described in the SanDisk Clip Zip Firmware Update section. I don't know how to do #5 .. please helpthank you: (Max dalton (author) from greater st. louis, missouri on February 06, 2012: hi mariah. no problem. I hope the article helped. thanks for reading. Max.Mariah on February 06, 2012: thank you very much! very useful! Help! sandisk sansa clip sport rockbox, sansa clip sport plus rockbox, rockbox firmware sansa clip sport
